## LETTER OF TRANSMITTAL

On behalf of the St'at'imc Human Resources Planning Committee, please accept this report as the final product of the St'at'imc Human Resources Planning Project.

The St'at'imc people and the businesses of the St'at'imc Territory appreciate the support of the Province of British Columbia through the contributions of the Labour Market Partnership project.

This St'at'imc Human Resources Planning Project provided valuable insight into both the skill needs of local and regional employers, and the skills capacity of the St'at'imc people. It also allowed us to hold numerous fruitful discussions with employers, community agencies, and training providers, which will allow us to work more closely together in the future.

Our hope is that we can now continue to the next stage, to identify and develop training options to meet the skills needs of the area employers, to allow our people to access long-term careers.

Sincerely,

Ernest Armann  
Chair, St'at'imc Human Resources Planning Committee

# Acknowledgements

The St'át'imec Human Resources Planning Committee thanks Ernest Armann, Implementation Manager, for chairing the meeting and managing this project. The Committee also thanks Catherine Pascal, Employment Assistance Services Lead, Lower St'at'imec Tribal Council, and Laura John, St'át'imec Education Training Manager, for liaison work with the committee and in the communities.

The Committee met on six separate occasions to discuss the Skills Gap Strategy project and meet with potential stakeholders on labour market developments. The Committee members include:

Bonnie Adolph St'át'imec Eco Resources	Brenda Frank Bridge River Xwisten
Ernest Armann, Chair St'át'imec Government Services	Laura John St'át'imec Government Services
Angelo Beltrame All Tech Line Contractors	Lesley MacDonald BC Hydro
Richard Blanchet Innergex	Catherine Pascal Lower St'at'imec Tribal Council
Mike Coyne Land and Sea Camp Services	Mandi Sellers Com Tech Learning Solutions
Sarah Moberg Tít'qet	

The Committee would also like to thank several organizations for sending representatives to our meetings to make us aware of their services and roles in the development of the skill sets of our community members.

We acknowledge:

- Mark Medonca, Owner Grimm's Deli & Gourmet
  - Director, Pemberton and Region Chamber of Commerce
  - Vice-President, Tourism Pemberton
- Ghazal Tohidi, Training Innovations,
  - WorkBC for Squamish, Whistler, Pemberton
- Gary McDermott, Director Aboriginal Initiatives, Industry Training Authority

# INTRODUCTION

## 1.0 INTRODUCTION

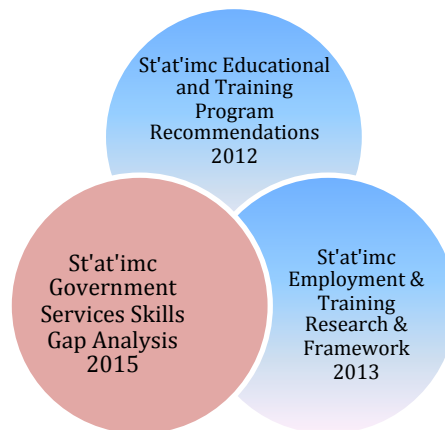

### 1.1 OVERVIEW

#### *St'át'imc at a Crossroads Job and Training Opportunities*

The St'át'imc people are at a crossroads, as a recent settlement with BC Hydro and future clean energy power projects provide both opportunity and means to increase the skills of the St'át'imc people to maximize local employment and economic development opportunities. The region is home to employment opportunities in forestry, clean energy, tourism, utilities, and the service sector. The eleven St'át'imc communities are located between Whistler and Tsalálh / Seton Lake, and Harrison Lake and Churn Creek, with more than 6,900 members and over 4,700 residents.

In order to develop a comprehensive training and development strategy, the St'át'imc communities and governments must first understand the requirements of the upcoming employment opportunities, the skills of the people within the communities, and the gaps between them. In this way, the strategy would then have a clear definition of what it will try to achieve. The figure below is a diagram showing the key components of the skills gap analysis.

The 2014-2015 Skills Gap Analysis builds on several reports generated by the St'át'imc Education and Training (SET) program. St'át'imc Government Services and St'át'imc communities are building joint ventures, new partnerships with industry new relationships with major industry leaders such as B.C. Hydro and Innergex. Designing a process that works must build on these previous reports and provide a process for implementation of previous recommendations and advise. Together these reports provide a solid foundation for action.

The St'át'imc Educational and Training Program Recommendations focused on labour market research and program recommendations. The above-mentioned reports are an excellent source of data including Population Characteristics; workforce by Industry; Population Growth projections; and Education Statistics (Management, 2012). Pages 69-89 provide excellent information on each community. Program recommendations with specific reference to the SGS Skills Gap Analysis can be found on page 66-67 of the report specifically with

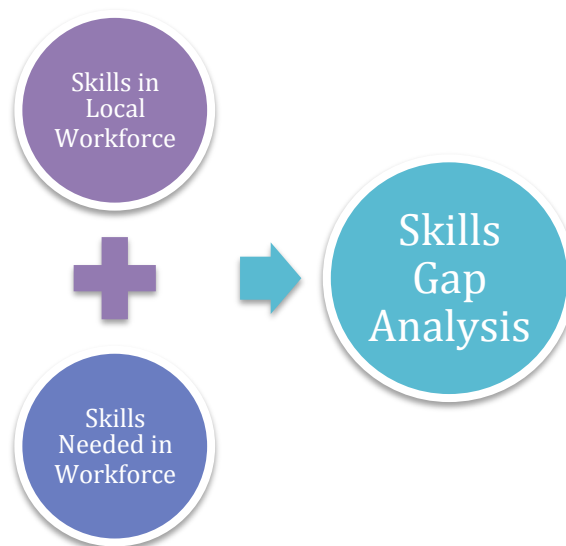

reference to recommendation #1 where long term education and training planning infrastructure is required, and in recommendation #2 to meet specific labour demand opportunities, requiring the identification of greater labour demands.

The SET Program Research & Framework Document, April 2013, was an inclusive framework from Early Childhood Education to Labour Market Jobs Training. The majority of the report's recommendations focused on the process of establishing the SET program. In the summary of recommendations item #5 Strategic Partnership Development suggests that partnerships must be strategically developed to align with SET programs. Item 5c suggests identifying and engaging Employment and Training partners and the development of a St'at'imc Employment and Training Centre.

**Clearly, the two key reports highlight the need for long term planning to meet local labour demand and create training infrastructure to host local skills development.**

**The Skills Gap Analysis 2014-2015 identifies local employment demand and determines available skills at the community level. This report also provides recommendations and strategies to meet the skills required.**

**FIGURE 1: SKILLS GAP ANALYSIS**

This report is the Skills Gap Analysis of the St'at'imc people and the local employment opportunities, conducted for the *St'at'imc Human Resources Planning Steering Committee*. The Ministry of Social Development and Social Innovation, through the Labour Market Partnership program, funds this project. The project Steering Committee is comprised of representatives from St'at'imc communities and local area employers, and is administered by St'at'imc Government Services.

## 1.2 SITUATIONAL CONTEXT

*The St'át'imc are the original inhabitants of the territory which extends north to Churn Creek and to South French Bar; northwest to the headwaters of Bridge River; north and east toward Hat Creek Valley; east to the Big Slide; south to the island on Harrison Lake and west of the Fraser River to the headwaters of Lillooet River, Ryan River and Black Tusk*

*The St'át'imc way of life is inseparably connected to the land. Our people use different locations throughout our territory of rivers, mountains and lakes, planning our trips with the best times to hunt and fish, harvest food and gather medicines. The lessons of living on the land are a large part of the inheritance passed on from St'át'imc elders to our children.*

*As holders of one of the richest fisheries along the Fraser River, the St'át'imc defend and control a rich resource that feeds our people throughout the winter, and serves as a valued staple for trade with our neighboring nations. The St'át'imc can think of no other better place to live.*

*Ci wa lb kalth ti tmicwa (the land is ours). The St'át'imc hold Title, rights and ownership to our territorial lands and resources. We are ucwalmicw (the people of the land). We are a nation, not an interest group. As proclaimed by our ancestors in the Declaration of the Lillooet Tribe, May 10, 1911: We claim that we are the rightful owners of our tribal territory and everything pertaining thereto. We have always lived in our country; at no time have we ever deserted it or left it to others. The source of these rights is St'át'imc law.<sup>1</sup>*

The St'át'imc Territory covers over 2.2 million hectares, of which 22% are provincial parks. The territory includes eleven communities, as well as the regional centres of Whistler, Pemberton, and Lillooet. See the map of the St'át'imc Territory on the next page. The St'át'imc communities include:

- Lil'wat – Mount Currie
- Xwísten – Bridge River
- Ts'kw'aylaxw - Pavilion
- Sekw'el'was - Cayoose Creek
- Tsalálh – Seton Lake
- T'it'q'et - Lillooet
- Xax'lip - Fountain
- N'Quatqua - Anderson Lake
- Xa'xtsa – Douglas
- Skatin
- Samahquam

The key industry in the region is natural resources, including forestry, mining and fishing, and has recently expanded to include small hydroelectric projects by BC Hydro and independent power producers through run-of-river projects. The region's economy also includes agriculture such as ranching, and tourism through the high luxury activities of Whistler, as well as lower-key tourism activities in the Pemberton region. As such, there are various retail and hospitality operators, but minimal government services, other than the St'át'imc communities themselves.

However, many of the communities within the region are not located near the areas of employment, resulting in weak connections to the local job market for many area residents. The community residents in general have low levels of high school completion and other post-secondary education, and limited experience in the labour market. As a result, even with the advent of local employment options, many residents are unprepared to access these jobs, while others are only in the lowest levels.

<sup>1</sup> [www.statimc.ca/about](http://www.statimc.ca/about)

FIGURE 2: MAP OF ST'ÁT'IMC TERRITORY

In 2011, the St'át'imc communities signed the comprehensive *St'át'imc Hydro Settlement Agreement* with BC Hydro and the Province of British Columbia to address grievances related to the construction and operations of the BC Hydro facilities within the territory. The eleven St'át'imc communities are impacted by many BC Hydro operations, including: three dams, two reservoirs, four generating stations, and fifteen transmission circuits. The Settlement Agreement includes the creation of funds for education and training.

St'át'imc Government Services has an agreement with the Province of British Columbia, Ministry of Social Development and Social Innovation, Partnership and Innovation Fund to conduct a Skills Gap Analysis between July 2014 and Spring 2015. The Labour Market Partnerships Program provides funding to encourage and support employers, community groups and communities in developing plans and strategies to improve their capacity for meeting human resource requirements and implementing labour force adjustments.

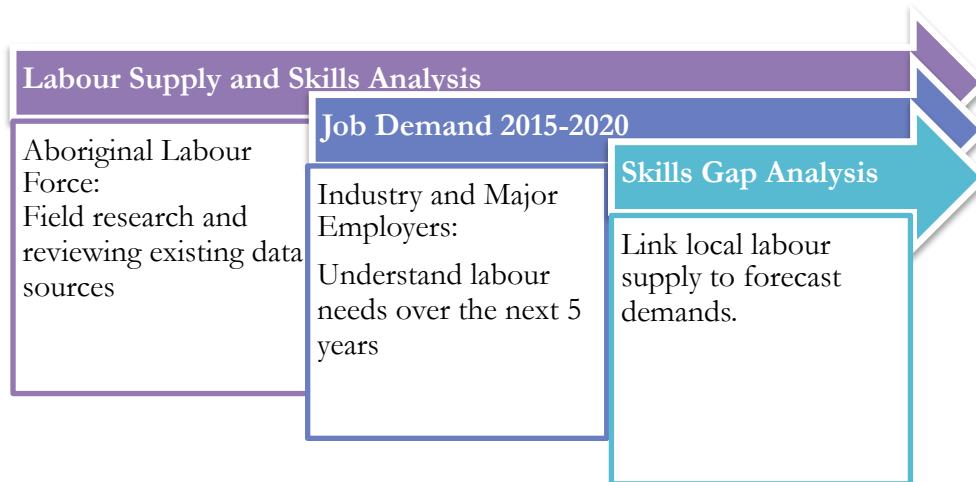

The labour market issue being addressed is the high unemployment and low skill levels of local Aboriginal working age population within the St'át'imc region. The St'át'imc desire is to participate in local economic development projects and this analysis will identify both jobs and demand for skilled workers as well as skill levels and community needs for skills training.

As an initial step, this Skills Gap Analysis was commissioned to determine the skills required to meet the expected employment opportunities in the region, both through the various power projects and over the longer-term. As well, the St'at'imc Educational and Training Program Recommendations, and SET Framework identified key industries including forestry, fishing, mining, education, health care, and administration.

This Skills Gap Analysis will also feed into larger initiatives including the SET Framework, which has four goals and seven objectives. This analysis supports the objective around both post-secondary education, and skills and employment training.

Section 2.0 of this report identifies the skill sets within the members and residents in the St'át'imc region. Section 3.0 identifies the employment prospects and skills required within the regional labour market. Section 4.0 identifies the gaps between what is required and what is present. The figure below is a simple graphic description of the Skills Gap Analysis. Section 5.0 presents a summary and strategic directions to address the skills gaps.

**FIGURE 3: SKILLS GAP ANALYSIS FLOW CHART**

### 1.3 REGIONAL SUPPORT AGENCIES

#### *Wide-range of Training Partners*

The St'át'imc Territory is large area and overlaps with several established regions in terms of data collection. The eleven St'át'imc communities and three significant towns are represented through three Regional Districts, two school districts, and three health regions, and serviced by two WorkBC Centres, three Chambers of Commerce, and three Aboriginal Skills Employment and Training (ASET) agencies. The key sets of employment and training service agencies in the region are described below, and presented in more detail in Appendix 1.

**TRIBAL RESOURCES**

Both the Lillooet Tribal Council (LTC) and the Lower St'at'imx Tribal Council (LSTC) offered training services in the past three years. LSTC has an agreement with Stó:Lō Aboriginal Skills Employment Training to delivery Employment Assistance Services.

The LSTC and LTC have both provided leadership on behalf of member communities to promote skills training and learning opportunities. Partnerships exist with post-secondary training providers and include Capilano University (which partnered with LSTC in 2013 to provide a Construction Boot Camp and Essential Skills training). LTC has partnered with Thompson Rivers University (TRU) and the Nicola Valley Institute of Technology (NVIT) to support the delivery of skills training including Adult Basic Education and introduction to trades.

Past Experiences in training delivery were identified and could be categorized as follows.

Lillooet Tribal Council Region		
LTC training	T'it'q'et (Lillooet Band)	(Bridge River)
Partnership with Thompson Rivers University for Adult Basic Education leveraged with local ASET.	Experience with Introduction to trades with NVIT Mobile trades unit	Partnership with Vancouver Island University for Environmental Technicians certification.
Partnership with Simon Fraser University First Nations Outreach Program.		

Southern St'at'imc			
LSTC			
Partnership for skills training leveraged by ASET relationship			
2014-2015	Office Admin Hospitality	Key To Employment First Aid Level 3	Heavy Equipment Operator Camp Cook
2013-2014	Boot Camp Entrepreneur	Road Builders	Prepare for Employment & Lifelong Learning
2012-2013	Carpentry Level 1	First Aid Level 3	Small Business Development
2011-2012	Green Card and Power Saw Safety	Food Safe	Safety Training
2010-2011	Project Management	First Aid Level 1	First Aid Level 3

The limited number of past training programs is not significant to determine whether outcomes would indicate success. Most programs were full and demand driven. The need for additional skills training is evident by the community surveys and requests for additional training. A survey of all eleven St'at'imc communities asked if the community were interested in hosting skills training and the response was a resounding yes for all communities surveyed.

At the time of this report the only active skills training program was in Pemberton with LSTC hosting a Heavy Equipment Operators Apprenticeship program.

## SCHOOL DISTRICT AFFILIATIONS

### School District #48 Sea to Sky

- Lil'wat – Mount Currie
- N'Quatqua - Anderson Lake
- Xa'xtsa – Douglas
- Skatin
- Samahquam

### School District #74 Gold Trail

- Xwísten – Bridge River
- Ts'kw'aylaxw – Pavilion
- Sekw'el'was - Cayoose Creek
- Tsalálh – Seton Lake
- T'it'q'et – Lillooet
- Xax'lip - Fountain

There is limited information about School District programs specifically for Aboriginal children or Adult education. At the time of this report, no adult training was being offered by either of the School Districts.

## COLLEGES/ POST SECONDARY WORKING AT COMMUNITY LEVEL

- Nicola Valley Institute of Technology (no affiliation agreement) provides contract services to communities and mobile trades centre. Adult Basic Education
- Thompson Rivers University (no affiliation agreement) Adult Basic Education contract services.
- Capilano University affiliation agreement with Tzil Learning Centre: Lil'wat
- Vancouver Island University Environmental Tech (6 weeks course)
- Kwantlen Polytechnic University: Trades Campus: Cloverdale (Carpentry at LSTC)
- Simon Fraser University: First Nations Outreach Program

## URBAN RESOURCES

WorkBC has offices in both Whistler and Pemberton and the Lillooet Friendship Centre provides employment assistance services to off reserve residents.

## 1.4 RESEARCH METHODOLOGY

The research for this study includes both secondary research of existing reports and data, as well as primary research including interviews and a survey, all validated with community discussions.

The Skills Gap Analysis first considered key studies, reports and strategies already commissioned by various St'át'imc government agencies, or other sources, including:

- Economic Development Assessment, Strategy and Action Plan; Squamish-Lillooet Regional District, District of Lillooet, Area A and Area B; December 2012
- How To Do Business With St'át'imc; St'át'imc Government Services; March 2013
- St'át'imc Education and Training Framework
- Sustainable SLRD, Integrated Sustainability Plan; Squamish-Lillooet Regional District; January 2013
- St'át'imc Education & Training Program Recommendations 2012
- Review of BC Hydro Annual Update for Operating Opportunities, Koho Power, 2014

- British Columbia Forest Sector Labour Market & Training Needs Analysis, BC Coastal Forest Industry Labour Market Information Working Group, 2013
- BC Major Projects Inventory, September 2014

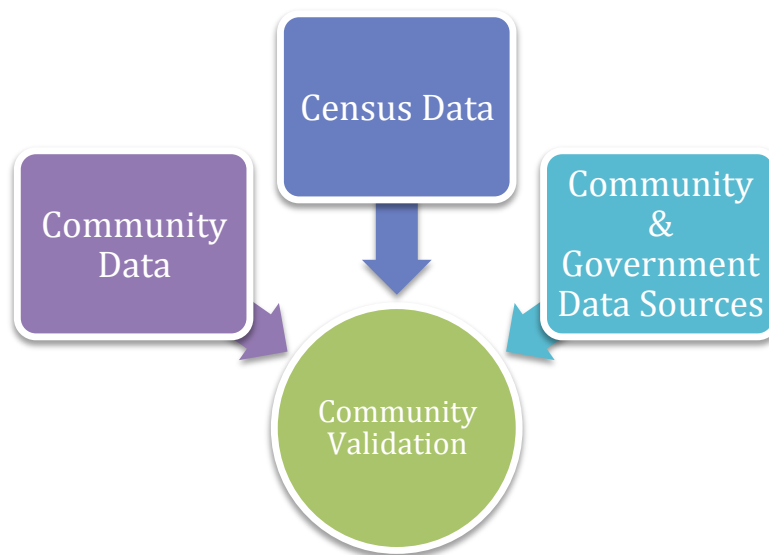

Once the basic data was compiled research began in two directions:

1. Community Data to determine the skill sets
2. Employer Data to determine the skill needs

#### 1.4.1 COMMUNITY DATA – SKILL SETS

To gather data on the skill sets of the Aboriginal people in the region, the research team utilized the following tools as presented in Figure 4 and described below:

**FIGURE 4: KEY SOURCES OF COMMUNITY SKILLS DATA**

1. Population and skills data provided by St'át'imc communities:
  - Community websites and related reports
  - Interviews with community leaders and administrators
2. Population data provided by government sources:
  - BC Stats Regional Profiles
  - Aboriginal Affairs & Northern Development Canada – Registered Population, Census and National Health Survey data
3. Secondary data provided 2011 Census Data through specific data runs, then compiled for each community, district municipality, town, and Census sub-region for the entire area:
  - Basic Targeted Data
  - Detailed targeted Profile
  - Census Canada website

This data was then validated by representatives of each the St'át'imc communities. Data on the skills of the community members were confirmed and validated by representatives of the employment and training arms of the communities, as well as through discussion with the WorkBC Centres.

It must be recognized that the skill sets of members is both objective and subjective, and is temporal, as individuals constantly evolve in the development of the work related skill sets.

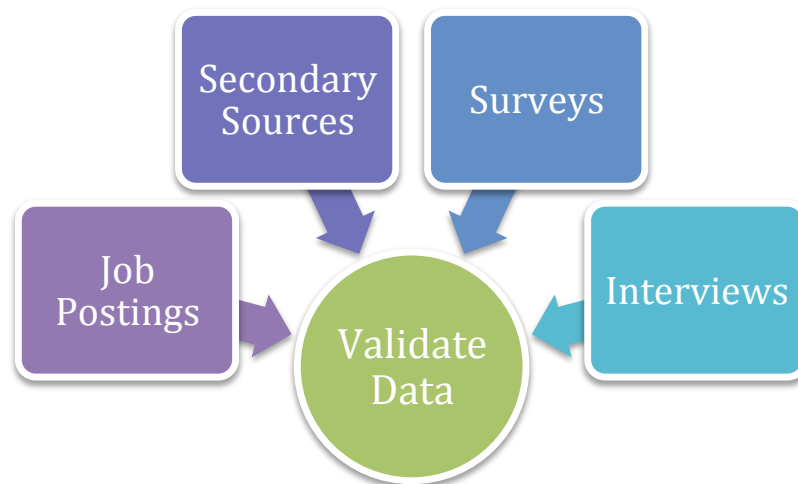

#### 1.4.2 EMPLOYER DATA – SKILL SETS

The employer data is much more difficult to collect as it is time-specific, and difficult to accurately predict into the future. A significant number of new employment opportunities in the region are expected to be generated by the construction of BC Hydro and independent power projects, and through the regular employment in the region.

Another complicating factor is the unique labour market of Whistler. It is a major regional and international tourism destination site and generates large numbers of jobs or such a small community. Whistler is in a corner of the region that is relatively inaccessible on a daily basis for many of the St'át'imc community members.

Therefore, this report employed four main data collection sources, and was validated by the project Steering Committee, as presented in Figure 5 and described below:

**FIGURE 5: KEY SOURCES OF EMPLOYER SKILLS DATA**

1. Fifteen Interviews with major employers in the region including construction, hospitality, forestry, utilities, community government, and business services, as well as with key service agencies such as WorkBC and Chambers of Commerce
2. An Employers Survey was administered through two BC Chambers of Commerce locations in Pemberton and Lillooet, resulting in ten responses. While these responses were too low to report on a quantitative basis, they yielded qualitative information that is included in the analysis of required skills.
3. Job Postings were captured during the last week of each month for four months starting in August 2014 and ending in November 2014. Job postings were collected online from WorkBC service centres, and pulling from over two-dozen job search websites, industry organizations, and local employers.

Every effort was made to capture all the jobs posted during the selected week, but some jobs may have been posted and pulled down before they were copied and analyzed.

4. Secondary Sources

The practice of compiling job postings is a practical way to understand employment demand within identified communities. The list of job posting sites used as sources for this data sample is not exhaustive, however it is comprehensive of all common avenues for advertising employment opportunities. The list below provides an excellent starting point for anyone wanting to survey job postings in St'át'ımc Territory.

# Part A: St'át'imc Labour Supply

IMAGE AND GRAPHICS BY  
WOLFEN PHOTOGRAPHIES

## SKILLS GAP ANALYSIS - 2015

Funding provided by the Government of Canada through the Canada-British Columbia Job Fund

## 2.0 ST'ÁT'IMC SKILLS GAP ANALYSIS PART A: LABOUR SUPPLY

### 2.1 DEMOGRAPHICS OF THE ST'ÁT'IMC PEOPLE

*6,904 St'át'imc Members - 4,739 St'át'imc Residents*

*Labour Force of 2,000 Workers*

A demographic profile of the Aboriginal population of the St'át'imc Territory was developed specifically for this project, based upon the 2011 Census data. The specifics of the 2011 Census data collection of the region are described in Appendix 2. While this section provides an overview of the demographics and skills profiles based upon the St'át'imc Territory as a whole, it does not include the St'át'imc people away from home.

Below are a series of four tables providing key demographic information highlights for the employment and skill level data. Appendix 3 presents a detailed breakdown of the population and labour force data by community.

**FIGURE 6: ST'ÁT'IMC POPULATION**

Membership	Residents	Non-Residents
6,904	4,739	2,165

**FIGURE 7: ST'ÁT'IMC RESIDENT LABOUR FORCE**

Resident Working Age	Not In Labour Force	Available Labour Force
3,530	1,550	1,980

**FIGURE 8: ST'ÁT'IMC LABOUR FORCE RATES**

Labour Force Participation	Employment	Unemployment
1,980	1,565	415
56.1%	79.0%	21.0%

**FIGURE 9: ST'ÁT'IMC LEVELS OF HIGHEST EDUCATION**

No Certificate, Diploma or Degree	High School or Equivalent	Apprenticeship Trades Certificate	College Certificate or Diploma	Bachelors Degree and Higher
995	975	635	650	160

### 2.1.1 ST'ÁT'IMC DEMOGRAPHIC HIGHLIGHTS

As of February 2015, there are 6,904 registered St'át'imc people, including 3,190 that live in the St'át'imc communities on Reserve.<sup>2</sup> While these figures are the most current, they do not take into account St'át'imc people that live off-Reserve in the St'át'imc Territory.

According to the 2011 Census, the Aboriginal population in St'át'imc Territory is 4,739 people in the eleven communities, plus the three towns (Whistler, Pemberton, and Lillooet), and the surrounding areas. The population includes 2,195 women, and 2,420 men, with a median age of 30.9 years old, much younger than the median age for British Columbia as a whole at 41.9 years of age.

The youth population is 605 people between 15 and 24 years old, with a further 920 people under the age of 14. The working age population is 3,530 people, aged 15-64 years old. Appendix 3 presents the demographic breakdown by age category and gender, with the showing the largest groups under 19 years of age, and between 35 and 55 years of age.

Please note that the 2011 Census figures are compiled from the figures of each community and Reserve, and are rounded to the nearest five. Therefore, many of the totals from one area may not quite add up to the total of another area.

As well, each set of figures starts with a different base number of people that reported on that topic, as not everyone provided details such as education, or employment data. So while there are a total of 4,739 people in the St'át'imc Territory that identify as Aboriginal, not all of those people responded to subsequent questions. For example, the data on employment below is based on 3,641 respondents, and the data for the education levels is based on 3,646 respondents. Appendix 2 provides more details on the data collection and reporting of the 2011 Census figures.

Therefore, the estimation on employment and skill levels within the St'át'imc communities and Territory are based on combining the Census data, with the data from the communities both quantitative and qualitative. No data set is perfect, as it not possible to have current and complete data on hundreds or thousands of individuals that are constantly changing. Individuals are in training, gaining skills, changing jobs, and moving. These data sets represent a time-based sample of skills and employment issues only.

### 2.1.2 ST'ÁT'IMC EMPLOYMENT AND SKILL DATA

Of the total labour force eligible population of 3,530 people aged 15 and older, 1,980 people were classified as in the labour force, and 1,550 people were classified as not in the labour force. Of those in the labour force, 1,565 were employed, 415 were unemployed, and 120 people were self-employed. Appendix 2 provides definitions of these terms.

---

<sup>2</sup> Aboriginal Affairs and Northern Development Canada, Registered Population, First Nations Profiles: <http://pse5-esd5.ainc-inac.gc.ca/fnp/Main/Index.aspx?lang=eng>

However, since these figures are based on total respondent of 3,641 people, or about 76.8% of the total population, the employment data is revised in the table below, estimating the figures based on similar proportions to the full population. Figure 10 below shows the highlights of the employment and labour force data by Census 2011 results and the revised estimates.

**FIGURE 10: ST'ÁT'IMC LABOUR FORCE INDICATORS (2011 CENSUS)**

Labour Force Indicators	Resident Population	Revised Estimate
Not in the Labour Force	1,550	2,062
In the Labour Force <i>Labour Force Participation Rate</i>	1,980 56.1%	2,634
Employed <i>Employment Rate</i>	1,565 79.0%	2,082
Unemployed <i>Unemployment Rate</i>	415 21.0%	552
<b>Total Labour Force</b>	<b>3,530</b>	<b>4,696</b>

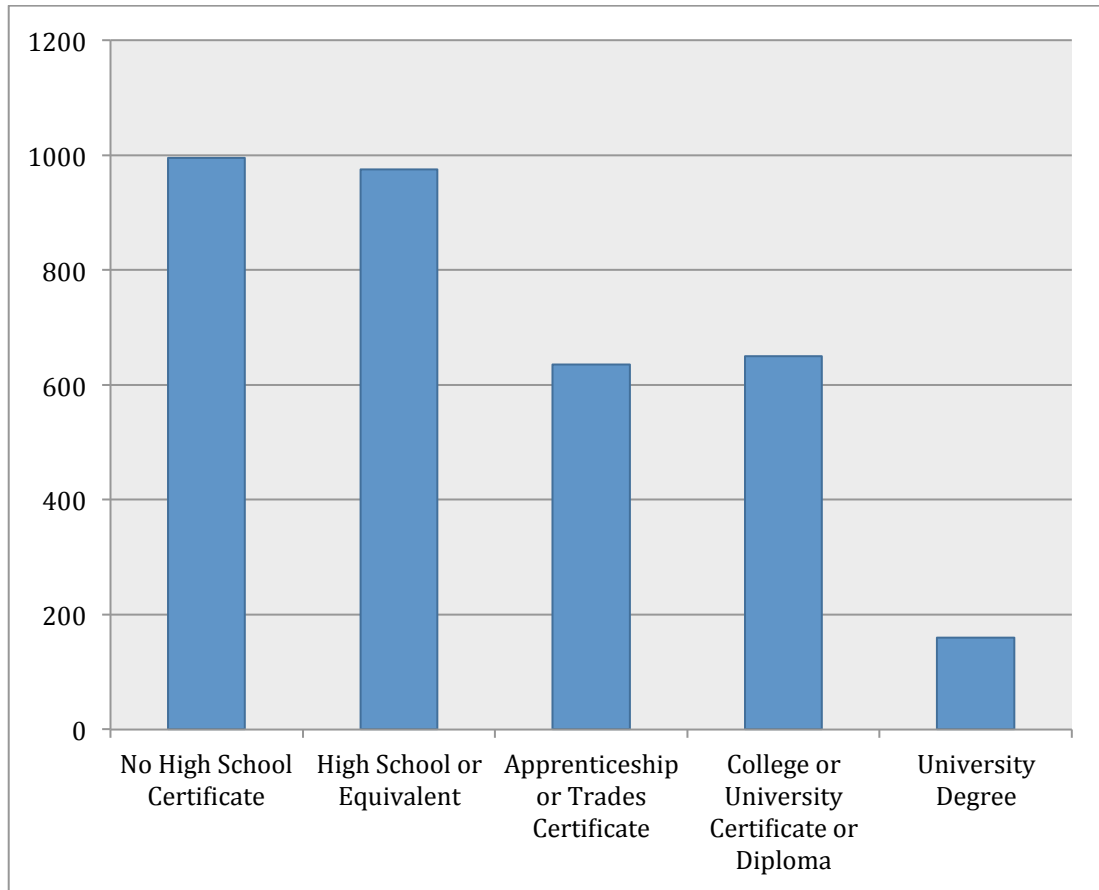

Of the total labour force population that reported education levels, 995 people had no high school certificate or diploma, while 975 people had high school or equivalent as their highest level of education. The St'át'imc have 635 people with an apprenticeship or trades certificate, 650 people with a college or university certificate, and 160 people with a bachelor's degree or higher. See the data and figure below.

Although there are a large proportion of people with no high school or just high school education, the St'át'imc people boast a significant number of with trades training and post secondary education.

**FIGURE 11: ST'ÁT'IMC HIGHEST LEVEL OF EDUCATION (2011 CENSUS)**

Highest Level of Education	Resident Population
No certificate, diploma or degree	995
High school diploma or equivalent	975
Apprenticeship or trades certificate or diploma	635
University or College certificate or diploma	650
University degree and above	160
<b>Total Labour Force Reporting Education</b>	<b>3,656</b>

FIGURE 12: ST'ÁT'IMC HIGHEST LEVEL OF EDUCATION (2011 CENSUS)

## 2.2 ST'ÁT'IMC COMMUNITIES

The 2011 Census data highlights each of the eleven St'át'imc communities and are presented in the table below. The figures include the 2015 Band Registration numbers, and the 2011 National Health Survey estimates for populations on-Reserve. These figures do not include the Aboriginal people living off reserve in the St'át'imc region.

The figures show the largest population in Mount Currie with over one-third of the entire St'át'imc population. Figures for Douglas First Nation were too small for the detailed Census report, so only the base population numbers are available. The figures for the St'át'imc people away from home are not included in this report, but could be part of a larger study.

As with most large data sets, the 2011 Census figures are more reliable for the region than for each community – the numbers are a better reflection of a larger population than a small community. Although the Census data is the largest collection of personal data in Canada, most individuals complete the so-called short-form Census. Therefore, the detailed employment and education data are derived from estimates, and not actual complete responses, and can appear skewed for smaller communities.

The Census Data on a community-by-community level needs to be viewed not as an absolute, but rather as a reflection. As with any Census data, they only reflect the responses of those in the community that actually responded to the Census.

FIGURE 13: ST'ÁT'IMC COMMUNITIES DEMOGRAPHIC HIGHLIGHTS

Item	Mount Currie Lil'wat	Bridge River Nxwisten	Pavilion Ts'kw'aylaxw	Cayoose Creek Sekw'el'was	Seton Lake Tsalálh	Lilloet T'it'q'et	Fountain Xaxlip	Anderson Lake N'quatqua	Douglas Xa'tsa	Skatin	Samahquam

# Part B: Regional Demand for Workers

IMAGES AND GRAPHICS BY  
WOLFEN PHOTOGRAPHIES

## SKILLS GAP ANALYSIS - 2015

Funding provided by the Government of Canada through the Canada-British Columbia Job Fund

### 3.0 ST'ÁT'IMC SKILLS GAP ANALYSIS PART B: LABOUR DEMAND

#### *St'át'ímc Employment Prospects On the Rise*

#### 3.1 EMPLOYMENT OVERVIEW

The St'át'ímc region is predominantly a natural resource based economy of forestry, fishing and mining. It also boasts a significant tourism and hospitality business in the Whistler region, with tourism and business service opportunities expanding from Whistler east. The region also provides a significant number of jobs within the band and government services. Outside of these opportunities, the most significant developments in the region have been the BC Hydro dams and generators, and power projects.

Employment over the next ten years looks extremely positive, with forestry on the rise, new power projects planned, and significant upgrades to BC Hydro facilities scheduled. New opportunities are being generated through tourism and hospitality activities. Additionally, the regional population continues to access employment through the eleven St'át'ímc communities and their various service agencies and economic development corporations.

The survey and interviews with employers and Chambers of Commerce all identified work ethic, attitude, and basic work skills as the key requirement for entry-level opportunities. While certain certificates like Food Safe, a drivers' license, or WHIMIS, may be required, there is a process in place for that. It is the basic work place attitude that is the most common barrier cited. Employers typically determine the work ethic and attitude through resumes, where they look for the completion of high school, drivers license, and a pattern of work experience. Employers also determine attitude through interview questions and answers. Once on the job, an employee's attitude is often reflected in their handling of safety issues.

Other skills like problem solving and people skills are cited as required for advancing through the workforce. These skills are required by supervisors, managers, and sales staff.

This section will look at the major projects expected in the region, as well as the current development projects of BC Hydro, independent power projects, forestry, tourism and hospitality, business services, and education and health services. High demand occupations will then be identified and analyzed for their required skills, certificates, and requirements.

The figure below shows how the demand for workers can be viewed starting with local demand, followed by regional and provincial, as most of the local residents want work in their communities.

**FIGURE 14: HIERARCHY OF EMPLOYMENT DEMAND**

### 3.2 ST'ÁT'IMC REGIONAL EMPLOYMENT

#### *Key Drivers of Employment*

##### *Forestry - Power Projects - Construction - Tourism - Services*

There is a wide-range of employers within the St'át'ımc region from tourism to clean energy. Information on the occupations and required skills was derived from a combination of posted employment opportunities, interviews with employers and industry associations, and data from employers and industry sources.

#### 3.2.1 LOCAL AND REGIONAL DEMAND: WORKBC JOB POSTINGS

Over four months, a total of 343 job postings were collected through WorkBC. The majority (308) of the job posting were for opportunities in Whistler, followed by 24 opportunities posted for Pemberton, 7 for Lillooet, and 4 for Mt. Currie. This sample is heavily weighted toward opportunities in Whistler, as it is the largest of the communities examined, and its labour market is characterized by seasonality and a transient labour supply. Opportunities in Whistler are often advertised in major city centers like Vancouver and Victoria in order to attract the necessary workers to the area.

There were significantly more jobs posted (125) in November than in the other months, which reflects the winter tourism season in Whistler and Pemberton. The table below shows the break down of job postings by community and by month.

**FIGURE 15: 2014 WORKBC REGIONAL JOB POSTINGS BY MONTH**

Month	Whistler	Pemberton	Lillooet	Mt. Currie	Total
August	90	3	2	1	96
September	50	5	1	-	56
October	58	6	2	-	66
November	111	10	1	3	125
<b>Total</b>	<b>308</b>	<b>24</b>	<b>7</b>	<b>4</b>	<b>343</b>
<b>% of Total</b>	<b>90%</b>	<b>7%</b>	<b>2%</b>	<b>1%</b>	<b>100%</b>

Once collected, the job postings were organized by occupational group in order to facilitate analysis. The top occupational groups were Accommodations & Food Services (33%), Retail & Sales (21%), Business & Government Services (13%), and Trades & Labour (13%).

As in the rest of the province, service sector jobs dominated the job-posting sample. This is also indicative of the strength of tourism in the Whistler area, where Accommodations & Services and Retail Sales related jobs made up 56% of the jobs posted. A note of caution about the job postings in Whistler – these jobs do not necessarily reflect the same opportunities in other parts of the region. Whistler is an international tourism destination resort, and their needs for hotel staff, chefs, and servers, are far beyond those of a local coffee shop in a smaller community. As well, it is located in a corner of the St'át'ımc region, really only accessible on a daily commuter basis for residents in Whistler or Mount Currie.

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

Looking past the jobs advertised in Whistler, and focusing on the smaller communities of Pemberton, Lillooet, and Mt. Currie, the most common jobs posted are in Businesses Services, Health Care & Social Services, and Trades & Labour. The following table provides more detail on the number job postings by industry and by community.

**FIGURE 16: WORKBC REGIONAL JOB POSTINGS BY INDUSTRY (2014)**

Industry	Whistler	Pemberton	Lillooet	Mt. Currie	Total
Accommodations & Food Services	112	2	0	0	114
Business & Government Services	36	7	2	0	45
Educational Services	3	0	2	1	6
Health Care & Social Services	15	5	0	3	23
Information, Culture & Recreation	21	1	1	0	23
Other	2	0	0	0	2
Retail & Wholesale	68	3	0	0	71
Scientific & Technical	3	1	0	0	4
Trades & Labour	39	4	2	0	45
Transportation	9	1	0	0	10
<b>Total</b>	<b>308</b>	<b>24</b>	<b>7</b>	<b>4</b>	<b>343</b>

### 3.2.2 BC MAJOR PROJECTS

The BC Major Projects Inventory (MPI) provides a useful lens through which to view upcoming and ongoing regional employment opportunities. The MPI lists all projects with a capital cost of at least \$20 million within the Lower Mainland and projects valued at \$15 million or more apiece in the rest of BC. St'át'ımc Territory is included in the Mainland/Southwest Regional District, thus only projects valued at or above \$20 million are included.

The following tables provide an overview of the major projects proposed, and under construction across the St'át'ımc Territory. The location noted is the closest population centre from the project.

The figure below shows the eight major projects currently proposed in the St'át'ımc Territory. There are three hydroelectric projects and one geothermal project near Pemberton for a total estimated cost of an impressive \$919 million. In Whistler there is a housing development, a tennis club, university infrastructure, and a wind farm proposed for a total estimated cost of \$420 million. The total estimated cost for the proposed major projects in the region is \$1.34 billion.

FIGURE 17: PROPOSED BC MAJOR PROJECTS IN REGION, SEPTEMBER 2014<sup>5</sup>

Location	Project	Company	Description	Cost (million)
Pemberton	Gun Creek Hydroelectric Project	Creek Power Inc.	36 MW run-of-river hydroelectric project located near Pemberton is listed in the BC Hydro 2008 Clean Power Call.	\$108
Pemberton	Hurley River Watershed Hydropower Project	Hurley River Hydro LP	46 MW run-of-river hydroelectric project located near Pemberton would divert flow of Hurley River to a powerhouse into Downton Lake above Lajoie Dam.	\$138
Pemberton	Ryan River Hydro Project	Ryan River Joint Venture	Proposed 145 MW run-of-river hydroelectric power project on the Ryan River 7 km north of Pemberton, joint venture with Ryan River Power and Regional Power	\$273
Pemberton Region	South Meager Creek Geothermal	Western GeoPower Corporation	A proposed 100 MW to 250 MW geothermal electric power plant located 70 km west of Pemberton.	\$400
Whistler	Baxter Creek Development	Bethel Lands Corporation	Proposed development on 22 acres to include 41 luxury townhomes and 48 single family homes.	\$20
Whistler	The Whistler Tennis Club	Holborn Group	Proposed development of a tennis and fitness club on 11.3 acres. The residential component will include 58 townhouse units, 123 condominium units and a seniors complex.	\$50
Whistler	Whistler International Campus	OKA Holdings Inc.	Proposed private university located on the 77 acre Alpha Lands site, 30 acres will be developed for the campus. 4 phases of construction will take place over 10 years.	\$270
Whistler	Whistler Wind Farm Project	Whistling Wind/Whistler-Blackcomb	Proposed wind farm in the Whistler-Blackcomb area. Potential power supply for 6,000 homes.	\$80
<b>Total</b>				<b>\$1,339</b>

<sup>5</sup> BC Major Projects Inventory, Updated September 9, 2014  
[www.jtst.gov.bc.ca/ministry/major\\_projects\\_inventory/pdfs/June2014MPI.pdf](http://www.jtst.gov.bc.ca/ministry/major_projects_inventory/pdfs/June2014MPI.pdf)

### 3.3 REGIONAL HYDRO PROJECT-BASED EMPLOYERS

#### 3.3.1 BC HYDRO

BC Hydro is a BC Government Crown corporation responsible for the generation and distribution of the province's electrical system. It generates between 43,000 and 56,000 gigawatt hours of electricity, with over 75,000 kilometres of powerlines, 300 sub stations, 900,000 utility poles, and 325,000 individual transformers. BC Hydro, and its two subsidiaries Powerex and Powertech, has over 6,000 employees, including over 1,900 through the International Brotherhood of Electrical Workers (IBEW), over 1,800 through the Canadian Office and Professional Employees Union (COPE), and over 2,400 non-unionized managerial and professional workers. There are also numerous contractors, including over 1,600 employees with Accenture Business Services that provide back-office support on contract.

BC Hydro has several key facilities in the St'át'imc region, as well as the agreement and funds for the settlement.

The BC Hydro facilities in the St'át'imc region include:

- Bridge River 1 & 2 Generating Stations 478 MW
  - Terzaghi Dam
- Lajoie Generating Station 25 MW
- Seton Generating Station 48 MW
- Daisy Lake Dam

It has offices in Bridge River, Shalath, Pemberton and Lillooet to serve the region, and the transmission lines link with the independent power projects in the area. These offices employ approximately 50 people with a wide-range of skills from electricians, powerline technicians, mechanics and apprentices. They also employ clerical staff, engineers, and manager. These offices also utilize a series of contractors for services such as:

- Construction workers rental accommodation
  - Skills: Building Construction
- Catering services
  - Skills: Food and Beverage
- Freight/ transport services
  - Skills: Commercial Driving License – Class 1,2,3,4
- Trailer rentals, maintenance and janitorial services
  - Skills: GT
- Environmental services
  - Skills: Conservation & Restoration, Haz Mat response
- Waste management services
  - Skills: Construction site waste, portable toilets
- Security services
  - Skills: Products and general labour
- First Aid services
  - Skills: Paramedics, general health, safety services, EMV, supplies, cert.

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

- Warehousing
  - Skills: Physical space, protected building storage
- Vehicle Repair shop
  - Skills: Mechanic, towing, heavy duty mechanic

A study by Koho Power anticipates 73 additional contracting opportunities in support of renovations and upgrades to these facilities over the next twenty years, ranging from \$10,000 to \$215 million. While these projects will require a wide-range of occupations as presented below with the number of projects and the expected value:

**FIGURE 18: BC HYDRO ST'ÁT'IMC REGION SUB-CONTRACTS**

Skills	Projects	20 year Component (millions)
Cement Mason/ Shotcrete	15	\$260
Drilling	5	\$50
Painter/Coating	6	\$50
Welder, Millwright, Pipe Fitter	17	\$45
Heavy Equipment Operator	13	\$42
Engineer	21	\$37
Large Civil Project Management	20	\$25
General Labourer	36	\$12
Building trades	8	\$10
Scaffolder	10	\$10
Environmental Monitor	12	\$3
Low Voltage Electrician	4	\$2
Annual debris removal	30	\$1.2
Arch Monitor	4	\$1
Annual Veg Management	4	\$0.4

Numerous support opportunities also exist through other service contracts, including:

- Freight and Transportations Services
- Catering Services
- Waste Management Services
- Construction Workers Rental Accommodation
- Trailer Rentals, Maintenance and Janitorial Services
- Environmental Services
- Security Services
- Firefighting Services
- First Aid Services
- Vehicle Repair Shop

## BC Hydro Direct Employment Opportunities

Entry-level and trades related employment across all of BC Hydro's operations in all regions is conducted through its two unions, the IBEW for electrical workers, and COPE for office workers. Employment for BC Hydro is conducted through their HR Department with information at [www.bchydro.com/careers.html](http://www.bchydro.com/careers.html).

BC Hydro has fifteen occupations for which they most typically recruit workers from the trades, technology and engineering jobs. They have also instituted several types of bridging programs to support individuals who may fall short of certain qualifications, but possess a strong set of other skills. While not all of the graduates of the support programs may ultimately qualify for BC Hydro employment, they may qualify for other industry employers or related training programs, as BC Hydro tends to have amongst the highest base standards for qualifications in the industry.

As well as the occupation specific skills and qualifications, BC Hydro, like many related employers expects certain standards for key skills and expectations, such as:

- Attitude and work ethics
- Personal appearance and presentation
- Computer use and software use, basic office, Internet portals, etc.
- Writing for business
- Understanding of the occupations and BC Hydro
- Career direction
- Prior work experience with good references
- Drivers Abstract
- Bank account
- Drug & alcohol testing

In the 2014 fiscal year, they planned to recruit 302 workers through three streams plus their youth hires:

### 1) Campaign Hires - Entry-Level Opportunities for Youth

BC Hydro has four entry-level employment programs for 175 youth and younger workers across its operations.

- Tour Guides: 23 positions a year, through three intakes, for four-month positions
  - High School graduates and/or post-secondary students with computer literacy, office skills, and customer service/sales experience
  - BC Hydro expects to hire 23 people each year from 2015 to 2019
- Conservation Outreach Representatives: 78 positions a year through three intakes, for four-month positions
  - High School graduates and/or post-secondary students with computer literacy, office skills, advanced communications skills, a valid drivers license, and customer service/sales experience
  - BC Hydro expects to hire 78 people each year from 2015 to 2019
- Co-ops: 20 seven-week term positions for 54 post-secondary students in an engineering co-op program
  - BC Hydro expects to hire 54 people each year from 2015 to 2019
- Youth Hires: 20 seven-week summer term positions with intakes in May and June.
  - These jobs are for high school graduates, 18 years of age and older, with English 12, Physics/Science 11, and Math 11
  - BC Hydro expects to hire 20 people each year from 2015 to 2019

## 2) IBEW Roles: Skilled Trades

BC Hydro has nine trades for 93 workers in 2014 through the IBEW, all requiring high school graduation, with high levels of English, math, and physics, as well as drivers license requirements. These trades are governed by the Industry Training Authority's apprenticeships system, except for the occupation of CPC Technologist, which is unique to BC Hydro, requiring very high skill levels.

In support of the trades jobs, BC Hydro has partnered with other utilities, such as Fortis BC, and community organizations, to deliver Utility Boot Camps, several weeks of focused training to upgrade skills and prepare people for jobs in the trades. Candidates who fall short of the academic requirements, but possess a combination of key skills can attend the Boot Camps, as a method for entry into the related trades. The key skills include:

- Personal awareness, safety consciousness
- Mental toughness, confidence,
- Working in a crew, responsible, accountable

## 3) The nine skilled trades and key requirements are listed below for all of BC Hydro's operations. Please note that the number of 2014 expected hires is also listed, and these figures will change from year to year, depending upon internal demand:

- 30 Pre-Apprentice Powerline Technicians
  - Grade 12, English 12, Physics 11, Math 11, Class 5 with Air Brakes, Class 3 Learners
  - BC Hydro expects to hire 45 people in 2015, and 30 in each year from 2016 to 2019
- 28 Powerline Technicians
  - Grade 12, English 12, Physics 11, Math 11, Class 3 with Air Brakes
  - BC Hydro expects to hire 45 people in 2015, 30 in 2016, and 28 in each year from 2017 to 2019
- 14 CPC Technologists
  - Electrical/Electronic Engineering Technology Diploma with Power and/or Communications option, Class 5/Class 7N, computer literacy, mechanical aptitude
  - BC Hydro expects to hire 7 people in 2015, 6 in 2016, and 9 in each year from 2017 to 2019
- 10 Electricians
  - Grade 12, English 12, Physics 12, Math 12, Class 5, Electrical Foundation, 1.5 years in the trade
  - BC Hydro expects to hire 15 people in 2015, 12 in each year from 2016 to 2018, and 13 in 2019
- 3 Cable Splicers
  - Grade 12, English 12, Physics 12, Math 12, Class 3 with Air Brakes, post-secondary courses in electrical theory
  - BC Hydro expects to hire 2 people each year from 2015 to 2019
- 0 Meter Technicians
  - Grade 12, English 12, Physics 12, Math 12, Class 5, Electrical and Computer Engineering Technology Diploma with Electrical Power option
  - BC Hydro expects to hire 0 people in 2015, 2 in 2016 and 2017, and 1 in 2018 and 2019

- 3 Generation Mechanics
  - Grade 12, English 12, Physics 12, Math 12, Foundation Training for Millwrights
  - BC Hydro expects to hire 2 people in 2015, and 3 in each year from 2016 to 2019
- 3 Vehicle Mechanics
  - Grade 12, English 12, Physics 12, Math 12, Foundation Training Heavy Duty/Commercial Transport, 2 years experience in the trade
  - BC Hydro expects to hire 1 person in 2015, 2 in 2016, and 3 in each year from 2017 to 2019
- 2 Winder Electricians
  - Grade 12, English 12, Physics 12, Math 12, Class 5, Foundation Training in related trade
  - BC Hydro expects to hire 4 people in 2015, 2 in 2016, and 1 in each year from 2017 to 2019

#### 4) COPE Roles - Technologists

BC Hydro has four types of technology occupations for 15 workers in 2014 through COPE requiring diplomas and related accreditation through the Applied Science Technologist and Technicians Association of BC (ASTTBC). These positions also require specific drivers' licenses. The four occupations and key skills are listed below. Please note that the number of 2014 expected hires is also listed, and these figures will change from year to year, depending upon internal demand:

- 1 Apparatus Testing Technician
  - Electrical and Computer Engineering Technology Diploma with Electrical Power option; Instrumentation Engineering Technology, ASTTBC membership, Class5/Class7N License
  - BC Hydro expects to hire 0 people in 2015, and 1 in each year from 2016 to 2019
- 7 Distribution Design Technician
  - Engineering Technology Diploma with Power Option, ASTTBC membership, Class5/Class7N License
  - BC Hydro expects to hire 6 people in 2015, 5 in 2016, 0 in 2017, and 1 in both 2018 and 2019
- 5 Engineering Technologists
  - Engineering Technology Diploma, ASTTBC membership, Class5/Class7N License
  - BC Hydro expects to hire 8 people in 2015, 0 in 2016, 5 in both 2017 and 2018, and 6 in 2019
- 2 Transmission Maintenance
  - Engineering Technology Diploma, ASTTBC membership, Class5/Class7N License
  - BC Hydro expects to hire 2 people each subsequent year from 2016-19.

#### 5) Managerial & Professional Roles - Engineers

BC Hydro offers an Engineer-in Training program (19 hires in 2014), for individuals with a degree in Engineering and eligibility for the Association of Professional Engineers and Geoscientists in British Columbia. BC Hydro expects to hire 21 people each subsequent year from 2015-19.

### Aboriginal Education and Employment Strategy

BC Hydro also offers an advanced Aboriginal Education and Employment Strategy that has achieved success over the last ten years. Their internal programs assist potential Aboriginal workers meet the various requirements through a Trades Trainee Bursary, Scholarships, and various outreach activities. They have sponsored utility boot camps in several communities to build awareness, and related skills.

#### 3.3.2 INDEPENDENT POWER PROJECTS

Over the past ten years, the St'át'ímc Territory has seen the development of several independent run-of-river hydro projects. Due to their locations, these projects involved relationships with several of the St'át'ímc communities with various employment initiatives, resulting in jobs around the construction of the projects. Employment included labouring jobs, road building, and trades jobs.

Innergex Renewable Energy Inc. manages ten run-of river projects in the surrounding region, generating over 250 MW of electricity. These projects have resulted in working relationships with the St'át'ímc communities in the region. Innergex currently has four other projects under construction in the territory to generate over 160 MW, listed below, with other projects in the proposal stages.

Projects Under Construction	Generation
Upper Lillooet	81 MW
Boulder Creek	25 MW
Tretheway	21 MW
Big Silver	40 MW

The construction phases of the project are conducted in work camps with crews of skilled trades people and labourers. Many of the local Aboriginal workforce on the projects received assessments, skills upgrading, and training through partnerships with organizations such as the Aboriginal Skills Group 3G. Key jobs include:

- Carpenters
- Labourers
- Heavy Equipment Operators
- Electricians
- Powerline Technicians
- Welders
- Heavy Duty Mechanics
- Ironworkers
- Concrete Finishers
- Millwrights
- Rod Busters
- Lube Persons
- Driller
- Batch Plant Operators
- Blasters
- First Aid Attendants

A key local sub-contractor, Dent Contracting, expects 65 person years of construction related work in support of the power projects, with the largest need for carpenters, heavy equipment operators, and general labourers.

The long-term operations of the facilities involve just two to five workers per facility, as well as several specialized contractors.

### 3.3.3 CAMP SERVICES

As the run-of river power projects are located in relatively remote locations, camps are required to house and feed the workforce, as daily commuting is not an option. These camps have a construction phase, operations phase, and take down phase, all requiring different skill sets. The camp companies often utilize local workers, as well as local contractors for delivery, waste management, and other regular services.

Jobs on the construction and take-down phases include: carpenters, plumbers, electrical, gasfitters, and heavy equipment operators. Once in operations, key jobs include:

- Catering
- Housekeeping
- Maintenance
- Managers
- IT
- Fire Technicians
- Accountants
- Waste Management
- Drivers
- Medical

Land and Sea Camp Services, an experienced local contractor, often employs local workers in these projects, and has developed an in-house training program to build the skills required for the operations of the facilities, particularly the cooks and housekeepers. Their program is call Stepping Stone, and has had success building the skills of local workers.

## 3.4 LOCAL AND REGIONAL INDUSTRIES

### *Local Employers Want Local Workers*

#### 3.4.1 ACCOMMODATION AND FOOD SERVICES

The Accommodation and Food Services industry includes many service related occupations within businesses that provide lodging for travelers or short-term residents in hotels, motels resorts, bed and breakfasts, hostels, industry work camps, campgrounds and RV sites; or those which prepare and serve food and beverages in restaurants, delis, bakeries, food trucks, caterers, night clubs, lounges, bars and pubs, as well as contractors who provide meals to hospitals or airlines.

Across BC, the Accommodation and Food Services industry has a comparatively young female workforce, with a greater than average proportion of part-time workers. Employment gain in this sector, as in most service sector industries, has recently experienced above average growth. According to BC Stats, 2013 Labour Force Survey employment gain in this industry from 2012-13 included over 2,300 new jobs, or a growth rate of 1.3%.

Wages in Accommodation and Food Service related occupations are lower than the provincial average, however some of these occupations include gratuities that in some instances can amount to several times more than the hourly wage. While small businesses in this sector are unlikely to offer benefits, larger companies and resorts tend to provide these for their employees.

A significant anomaly in the region is the resort community of Whistler, an international tourism destination centre. As home to many Winter Olympic venues in 2010, the community received significant upgrades and international press. Its retail, hospitality, and tourism services tend to be extremely high-end, especially compared to the rest of the region. A server at a medium to high-end bar or restaurant in Whistler can earn far and above a server at a diner in a smaller location. As a result, the positions in Whistler for entry-level or low-skilled jobs are not comparable with similar jobs in the rest of the region.

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

The labour market of Whistler is also often in high demand for specific skills, and has been adversely affected by changes to the Temporary Foreign Worker program, which often supplied many of the area's workers. This could create more opportunities for the St'át'ímc workforce of which one third are located within a one hour drive of Whistler. One example of a key job in high demand in Whistler is Cooks with Level 2 certification.

The success of the Accommodation and Food Services industry is impacted by tourism. As such, it is no surprise that Whistler has many employment opportunities in this sector. A full 33% of all job posting collected were in this industry.

Typical employment opportunities advertised in the region included:

- Cooks
- Housekeepers
- Food and Beverage Servers
- Managers and Supervisors

The skills and training needed for employment in this sector varies. Cooks and bakers may require some training or even Red Seal certification, however the majority of jobs in this sector require no formal training, and skills can be gained on the job. Many people start their employment in this industry bussing tables, washing dishes, or housekeeping, and then advance on the merit of their work ethic and skills. Having knowledge of customer service principles, computer literacy, and cash handling are benefits for many jobs.

While only 2 of the 114 Accommodation and Food Service job postings analyzed were for employment outside of Whistler, this industry provides unique opportunities in smaller communities for self-employment and home based businesses. For example, Bed and Breakfasts or catering can be an excellent source of revenue.

### 3.4.2 BUSINESS & GOVERNMENT SERVICES

The Business & Government Services employment group includes the eleven St'át'ímc communities and their respective departments and development corporations, as well as the several umbrella and support organizations such as St'át'ímc Government Services, the In-SHUCK-ch Nation, the Lillooet Tribal Council, and the Lower St'át'ímc Tribal Council. These jobs range from receptionists and administrative support, to program managers, supervisors, and executives. These same types of jobs are also available in area businesses.

These occupations provide support for the day-to-day operations for a range of businesses and government organizations. Office Mangers, receptionists, HR and communications professionals, accountants, bookkeepers, general office support workers, security guards, janitors, and caretakers all fit under Business & Government Services.

Business Services and Government Services (or commonly called Public Administration) are not generally grouped together into one industry. However, the analysis of job posting revealed that the employment opportunities advertised in both sectors were interchangeable in terms of the kinds of skills opportunities that exist and the skills that are required. As such, it made sense to collapse these sectors together for the purposes of this project.

As well, environmental technologists and archaeology monitoring are often categorized into natural resource-based occupations; however, as these services are key to the development of the St'át'ímc governments, these occupations are included under business and government services.

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

There were 45 Business & Government Services employment opportunities: 36 in Whistler, 7 in Pemberton, and 2 in Mt. Currie. Some of the occupations advertised in this employment group were:

- Administrative Assistant/ Front Desk Assistant/Receptionist
- Legal Administrative Assistant
- Bookkeeper
- Accountant
- Night Auditor
- Security Officer

The skills required for these occupations vary across a wide spectrum. Higher skilled opportunities require post-secondary degrees and certificates. Entry-level and assistant level occupations require numeracy, computer skills, basic accounting skills, interpersonal skills, attention to detail, and a willingness to work as part of a team.

A significant number of St'át'imc people are already employed in administration in both public and business services.

### 3.4.3 CONSTRUCTION

The Construction industry includes businesses that construct, repair and renovate buildings, engineering projects, and developing land. This industry is large and includes a diversity of business types and occupation groups. Workers in this industry can be self-employed or work for small or large businesses, and they may work on a specific stage of a project or be a part of it from beginning to end. The occupation and skill requirements for construction are similar to those for mining and utilities.

The Construction industry is closely tied to the overall economic growth – when the economy grows so does the construction industry, and the inverse is also true. Major projects (detailed in section 3.2.2 above) also have a significant impact on employment opportunities in this sector.

With regards to the regional job postings collected (described in Section 3.2.1 above), 45 job postings (13%) were in the Construction industry. The occupations represented in the job postings were wide ranging, as were the skills and education required.

The following is a list of the most commonly advertised job opportunities in the job-posting sample:

- General Labourer/Trades Assistant
- Carpenter
- Painter
- Drillers
- Traffic Controllers (Flag People)
- Gas Fitter
- Heavy Equipment Operator
- Blasters

While each occupation requires specific skills, for example, Carpenters and Gas Fitters were required to hold Red Seal certification; many of the lower-skilled occupations emphasized some previous on-the-job experience as desirable. Almost half of the required applicants hold a valid drivers' license, and First Aid certification is always considered an asset in this field. Many companies hire labourers, and then apprentice those with the required interest and attitude into the skilled trades.

### 3.4.4 EDUCATIONAL SERVICES

The Educational Services industry includes public and private, for-profit and non-profit institutions engaged in providing instruction and training to children, youth, and adults. Employment demand in this sector is relatively stable. The majority of people employed in Educational Services are women.

Province-wide, the sector saw a modest loss of 0.6% between 2012 and 2013. Looking forward, however, it is likely we will see modest gains. As technology advances and the need for skilled labour grows, so does the need for increasing numbers of people employed in educational services. Anywhere that population is expected to grow, an accompanying upswing in Educational Services opportunities should also be expected.

Of the 343 job postings analyzed, 6 were within the Educational Services industry. They included the following employment opportunities:

- Kindergarten Teacher – Whistler
- English as a Second Language Instructor (part-time) – Whistler
- Adult Ed Instructor - Whistler
- Waste Reduction Educator – Lillooet
- Continuing (Adult Ed) Studies Community Coordinator – Lillooet
- Math Instructor – Mt. Currie

All of these employment opportunities require some post-secondary education, and some previous experience; all offered above average wages.

### 3.4.5 FORESTRY

The BC forest industry is famously cyclical with high peaks and low valleys. After the 2008 worldwide recession, the BC forest industry hit a deep low, as it was combined with the mountain pine beetle epidemic, which required mass harvesting creating a glut of supply. However, expanding markets in Asia combined with a now growing housing market in the US, along with a low Canadian dollar, means that BC forest products are again in high demand. A recent labour market study for the Truck Loggers Association predicts an industry need of 4,700 forest workers within the decade.

As well, changes within the industry now require forest workers to have minimum levels of training in chain saw use and other safety features, in order to address the high rates of accidents and injuries. So far this mandated training has proved successful.

One of the features of forestry related jobs is that there are several entry-level opportunities requiring relatively little training and experience, and often pay quite well. The BC forest industry, and the St'át'ımc region in particular, have a high demand for four types of jobs:

- Silviculture workers
- Fallers
- Fire Fighters
- Traffic control and communications

Other related jobs include people with planning skills to identify and develop forestry and other natural resources business and employment opportunities. As well, jobs related to environmental services, archaeology, and heritage are needed for forestry and other natural resources related projects.

The forestry operations run by St'át'ımc communities and economic development corporations generally have enough workers, while other industry operators report difficulties finding skilled workers in certain local areas. Many of these jobs tend to be seasonal, working outdoors, sometimes in camps, and involving strong levels of physical activity.

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

According to a regional forestry employer and trainer, there are typically three types of workers with general skill sets that are interested in forestry related jobs:

- 1) Forest Fire: a group of workers experienced with fire fighting, which involves a great deal of forestry and safety training; these workers tend to be the most experienced
- 2) Chain Saw: another group of workers with experience operating chain saws and falling, additional forestry experience is limited
- 3) Construction: a third group, generally in their 30's, with some experience in construction; while others in their 20's with very limited experience

### Forestry Boot Camp

Lil'wat Forestry Ventures LLP utilizes a Forestry Boot Camp model, developed by some of their managers with the College of the Rockies. The Forestry Boot camps typically last for 16 days, although it can be lengthened or shortened to adjust curriculum as needed. Graduates receive a College of the Rockies Certificate, as well as related specialty certificates within the program. Key skills built include:

- Chain saw training
- First Aid Level 1 with Travel Endorsement
- S11 & S185 fire fighting
- Green Card to work under power lines
- Bear Aware, Fall Arrest, WHIMIS, and general safety
- Team building and other soft skills
- Culture and heritage features
- Silviculture survey, GPS, map reading, clinometers, measurements, tree species, riparian, wildlife

While most students pass the course, some struggle with Essential Skills, attitude, and study habits. Typically, at least one graduate goes on to take further forestry related training in technical schools, leading to Register Forestry Professionals, and other designations.

### 3.4.6 HEALTH CARE AND SOCIAL SERVICES

The Health Care and Social Services industry includes services that provide health care, residential care for both medical and social reasons, and social assistance services. Common services in this sector include nursing, home-care, child-protection, welfare, social housing and counseling. Health Care and Social Services also includes childcare.

The Health Care and Social Assistance industry was BC's second largest employer in 2011. The industry has an exceptionally steady employment rate with little variation resulting from economic fluctuations. The workforce is predominantly female, and wages are significantly higher than other industries.

In the sample of job postings collected for St'át'imc Territory, included 23 jobs in the Health Care and Social Assistance industry: 15 in Whistler, 5 in Pemberton, and 3 Mt. Currie. Seven of the job postings were for employment opportunities with governmental organizations: Lil'wat, Vancouver Coastal Health, and the Resort Municipality of Whistler. The remaining sixteen jobs were for private organizations, the majority of which are not for profit.

The skill level required for the jobs advertised varied greatly from entry-level to professional. The following are a sample of the occupations advertised:

- Early Childhood Educator
- Youth Program Leader
- Esthetician
- Medical Radiation Technologist
- Physiotherapy Assistant
- Mental Wellness Intake Coordinator
- Counselor
- Dentist

The most common employment opportunity in this industry was for childcare workers. It is also well known that many childcare workers are self-employed and have home-based businesses. These opportunities would not be reflected in a sample of job-postings, but are important to consider. In any community that has a growing population of children, childcare will be a growing and consistent field for employment. Early Childhood Educator certification is a great advantage in this field and usually required for working in a larger center or for taking in more than a proscribed number of children in a home-based setting. Additionally, First Aid certifications are often required or desired.

### 3.4.7 INFORMATION, CULTURE AND RECREATION

There are two overlapping sectors contained under the Information, Culture and Recreation industry: Information and Cultural Services; and Arts, Entertainment and Recreation. Information and Cultural Services includes telephone, radio, television, film, theatre, books, magazines, newspapers, video games, as well as computer programmers and interactive media developers. The Arts, Entertainment and Recreation sector includes performing arts companies, such as theatre, dance and music groups; museums and nature parks; and sports-related businesses and activities. Graphic design related occupations cross over between these two sectors.

Workers in the Information, Culture and Recreation industry are younger than average and earn wages close to the provincial average. Because thriving tourism results in increased demand for arts, entertainment and recreation, Whistler in particular has a higher than average proportion of employment opportunities in these fields.

Of the job postings collected, 27, or 8%, were in the Information, Culture and Recreation industry. Four of these were for computer programmers, web marketing design, or software development. The rest were firmly recreation focused.

Of the 23 jobs advertised, no two were the same, however all of them reflected the popularity of the region for winter activities. Examples include the following:

- Snowshoe Guide
- Tube Park Lead
- Cross Country Patrol
- Skate Host
- Tour Guide
- Ski Concierge

Each of these occupations requires a combination of very specific physical skills, and customer service skills. Working as a guide of any kind requires a person to be patient, knowledgeable, confident and kind. Employers are looking for people who enjoy working with the public, and are good communicators. Additionally, First Aid certification was required across the board.

### 3.4.8 RETAIL AND WHOLESALE

The Retail and Wholesale Trade industry is made up of businesses who sell consumer goods that have been purchased from suppliers. Wholesalers function as the “middle man” supplying goods to retailers, and retailers deal directly with the final consumers of goods. Together the Retail and Wholesale Trade industry includes everything from small corner stores to box chains and wholesale distribution centres.

The Retail and Wholesale Trade industry is the largest employer in BC, accounting for just over 15% of all jobs in the province, and projected growth rates are higher than average. The job growth reported provincially for this sector is reflected regionally as well. Of the job postings surveyed in the St'át'imc region, 21% were in this sector. The majority of these

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

employment opportunities were in retail trade. The most commonly advertised employment opportunities in this sector were:

- Retail Salesperson (Sales Associate, Customer Service Representative)
- Cashier
- Retail Manager

The Retail and Wholesale Trade industry employs more young workers than other sectors, and pays wages below the provincial average. For most jobs, education is not required and training can occur on the job. Desired skills in this sector include cash handling, computer literacy, and customer service skills.

### 3.4.9 TRANSPORTATION

Businesses in the Transportation industry are involved mainly in transporting passengers and goods. Truck drivers are the most common occupation in this industry, along with bus and taxi drivers. Older workers outnumber younger workers in this sector. Women account for only 22% of the Transportation and Warehousing workforce.

In 2013, employment in this sector accounted for just over 5% of total employment in BC. Employment loss in this industry, according to the 2013 Labour Force Survey, amounted to a 7,700 fewer jobs from 2012-13, a net loss rate of -6%. Wages in this industry are comparable to the provincial average for older workers (55 years of age and older), but tend to be comparatively higher for young workers (under age 25). More than half of all employees are unionized.

Of the job postings surveyed for this project, 10 (3%) were in Transportation and Warehousing. Most of these were for delivery drivers. The required certification included a valid class 4 or 5 driver's license, and a clean Drivers' Abstract form ICBC.

# Skills Gap Strategy

IMAGES AND GRAPHICS BY  
WOLFEN PHOTOGRAPHIES

## SKILLS GAP ANALYSIS - 2015

Funding provided by the Government of Canada through the Canada-British Columbia Job Fund

## 4.0 ST'ÁT'IMC SKILLS GAP ANALYSIS PART C: STRATEGY

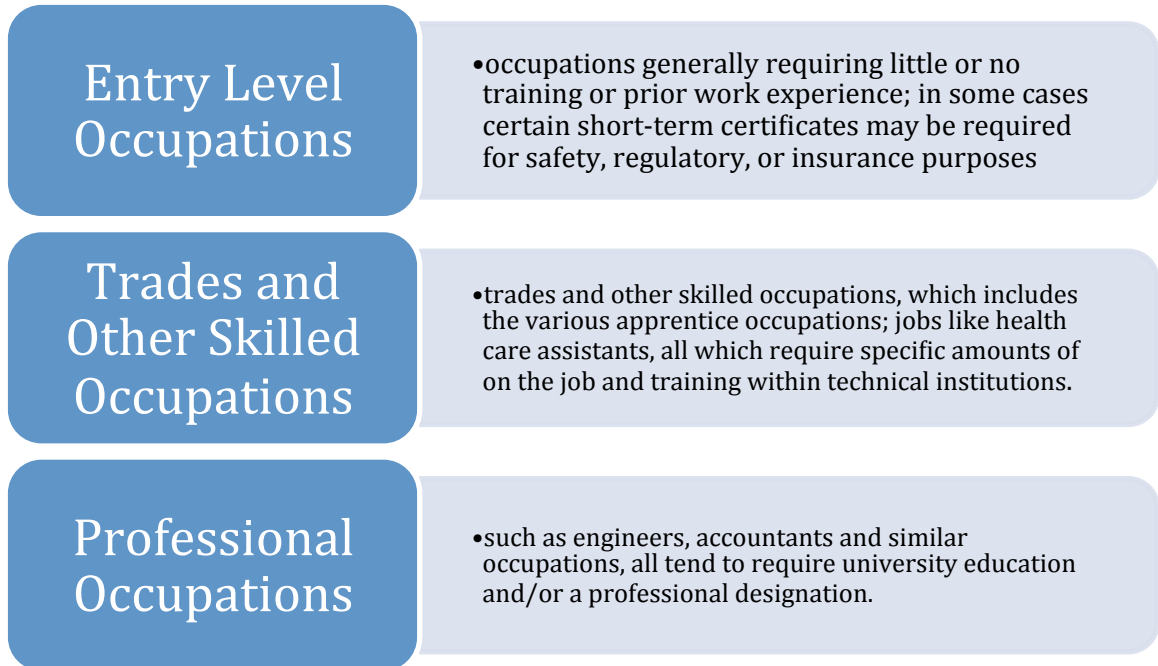

### 4.1 SUMMARY OF SKILLS NEEDED IN REGIONAL WORKFORCE

*“We need to talk about jobs and training”*

*Chief Kevin Whitney, T'it'q'et*

The occupations in demand described in the section above contain a wide range of skilled needs, which are summarized in three broad categories, for the purposes of this analysis. These categories are described below then presented with the various required or preferred skill sets, and the related occupations in demand. The graphic below summarizes the three categories and their focus.

**FIGURE 19: CATEGORIES OF SKILLS IN DEMAND**

The first category is entry-level, which includes occupations generally requiring little or no training or prior work experience; although in some cases certain short-term certificates may be required for safety, regulatory, or insurance purposes. The second category of trades and other skilled occupations, which includes the various apprentice occupations as well as jobs like health care assistants, all which require specific amounts of on the job and training within technical institutions. These two categories make up the bulk of the occupations in demand, and the focus of this analysis.

There are also a number of key jobs in the professional category with high salaries, but relatively few local opportunities in the professions such as engineers, accountants and similar occupations. These all tend to require university education and/or a professional designation.

## 4.2 SKILLS FOR ENTRY-LEVEL OCCUPATIONS

### *Most Jobs Require Training*

The top ten entry-level occupations have been identified as in demand across the St'át'imc Territories. These occupations are in high demand, with significant opportunities currently as well as projected for the future.

- |                     |                                 |
|---------------------|---------------------------------|
| 1. Cashier          | 6. Receptionist/Admin Assistant |
| 2. Custodian        | 7. Retail Sales Associate       |
| 3. General Labourer | 8. Security Guard               |
| 4. Housekeeper      | 9. Server                       |
| 5. Painter          | 10. Sport/Tour Guide            |

Entry-level occupations do not require any formal training or certification; however there are some basic qualities and skills that employers look for to guide their hiring practices. Assessing work readiness, work ethic, and essential skill level are key for any employer. In addition, there are some basic certifications that can set an entry-level job seeker apart.

See Appendix 4 for a list of the most prominent entry-level occupations, the skills required, local training provides, and details on the job, along with related links.

### *Be Work Ready*

#### **Work Readiness**

Work readiness requires that basic life skills and that situational factors are in place in order to support a job seeker in finding employment, and staying employed. Many of the barriers to work readiness are a result of poverty, isolation, and the ongoing impacts of colonization. The impacts of Residential schools are felt deeply in these communities, as the region includes some of the last schools in Canada to close in the 1980's.

The following seven factors have been identified as critical for work readiness:

- 1) **Transportation** – The ability to access reliable transportation is necessary for maintaining employment. This is especially true in the St'át'imc Territories where people often have to travel significant distances for work.
- 2) **Accessibility** – In order to obtain and maintain employment, people need to be accessible by employers. This means they need a reliable telephone or messaging service. If the employer uses email communication, employees will need regular access to computers with Internet access.
- 3) **Housing** – If a person does not have their basic housing needs met, it is very difficult for them to obtain or maintain a job. Without a home, people expend a lot of energy meeting basic needs and are often unable to get to work on time everyday and be able to practice the necessary personal hygiene.
- 4) **Childcare** – People with children require dependable and appropriate childcare in order for them to obtain and maintain employment. This can be a significant barrier for women as the responsibility for childcare often falls to them. While family members can provide childcare, if care is not reliable or safe then it will lead to difficulties for the employee.

- 5) **Criminal Record** – If a person seeking employment has a criminal record or outstanding warrants, this can function as a significant barrier to obtaining employment.
- 6) **Mental Health** – Depression, anxiety, anger issues, active drug and/or alcohol abuse, domestic violence, and past trauma (for example, Residential School Survivors) all pose significant barriers to obtaining and maintaining employment as they can result in unreliable attendance, difficulty accepting direction, and poor performance on the job.
- 7) **Physical Health** – In order to obtain and maintain employment, a job seeker must be in good physical health. Untreated health issues and poor lifestyle choices can lead to unreliable attendance at work and can also impede a person's ability to complete the tasks they were hired to complete.

### Work Ethic

A strong work ethic is the most important skill a job seeker can possess, and all other skills will flow from it. More than a skill, work ethic is a value or virtue based on commitment to hard work and diligence and the belief that there is value in work done well.

Work ethic is demonstrated in a multitude of ways – some small, like showing up with freshly brushed teeth, and others large, like a willingness to take on more responsibility and step into leadership roles. The following are six basic features of a strong work ethic:

- 1) **Punctual & Dependable** – Employers value employees who show up on time every day they are scheduled, with the required equipment and clothing, and who will take the appropriate steps to communicate with the employer promptly and respectfully on the odd occasion they are unable to make it to work on time or at all.
- 2) **Positive Attitude** – Employers highly value employees with a positive attitude as they make the job more pleasant to go to each day, and leads to a higher degree of efficiency. A positive attitude gets the work done, takes direction well, and motivates others to do the same without dwelling on the challenges that inevitably come up in any job.
- 3) **Motivated** – Employers look for people who take initiative and are motivated to get the job done efficiently and with a high level of quality and care. Employees who can work independently with minimal direction are highly valued as they make the employer or supervisor's job easier.
- 4) **Respectful** – Employers want employees who are respectful of co-workers, supervisors, clients, personal property and equipment. Employees represent the company they work for and need to comport themselves accordingly. This extends to how employees present themselves – good hygiene demonstrates self-respect.
- 5) **Honest** - Employers value employees who maintain a sense of honesty and integrity above all else. Good relationships are built on trust. When working for an employer they want to know that they can trust what you say and what you do. Successful businesses work to gain the trust of clients, and it is the responsibility of each person to use their own individual sense of moral and ethical behavior when working with and serving others within the scope of their job.

## Essential Skills

The Government of Canada recognizes nine Essential Skills for the workplace. Every job requires the use of these skills to some degree and at different levels of complexity. Additionally, essential skills provide the foundation for learning all other skills and enable people to evolve with their jobs and adapt to workplace change. The nine essential skills are:

- 1) **Reading** - The ability to understand reading materials in the form of sentences or paragraphs. This skill includes scanning for information and overall meaning, evaluating what is read, and integrating information from multiple sources.
- 2) **Document use** - The ability to perform tasks that involve a variety of information displays in which words, numbers, symbols and other visual characteristics are given meaning by their spatial relationship. This skill includes reading and interpreting signs, labels, lists, graphs and charts.
- 3) **Numeracy** - The ability to use numbers and think in quantitative terms This skill includes numerical estimating, money math, scheduling or budgeting math and analyzing measurements or data.
- 4) **Writing** - The ability to write text and documents; it also includes non paper-based writing such as typing on a computer. This skill includes organizing, documenting, providing information to persuade, requesting information from others and justifying a request.
- 5) **Oral communication** - The ability to use speech to give and exchange thoughts and information. This skill includes greeting people, taking messages, reassuring, persuading, seeking information and resolving conflicts.
- 6) **Working with others** - The ability to work with other workers to carry out tasks. This skill includes communicating with team members, engaging in leadership activities, following direction, and problem solving together with others.
- 7) **Thinking** - The ability to engage in the process of evaluating ideas or information to reach a rational decision. This skill includes problem solving, decision-making, critical thinking, and planning and organizing job tasks.
- 8) **Computer use** - The ability to use different kinds of computer applications and other related technical tools. This includes operating cash registers, using word processing software, sending emails, and creating and modifying spreadsheets.
- 9) **Continuous learning** - The ability to participate in an ongoing process of acquiring skills and knowledge. This skill includes the willingness to learn from fellow staff members, supervisors, and engage in on –the-job training. It assumes that there is no end point to learn but rather that it is an ongoing activity regardless of expertise or depth of experience.

## Certificates

The following certificates are a boost to any resume. If the skills are not directly transferable, successful completion of any course demonstrates work readiness, work ethic, and command of essential skills. All of them are low-cost, and require minimal time commitment.

- **First Aid** -First Aid is a valued skill on any job site. First Aid certification is provided through a variety of organizations. There are several levels of First Aid certification and specialization, but the first step is completing a Standard First Aid & CPR course. These courses are usually 14-16 hours in length and are offered with a variety of scheduling options. Most often, they are taught over two days. Completion requirements include 100% attendance, skills demonstration and 75% on a written test. Standard First Aid & CPR certification is good for 3-years, after which recertification occurs through a 6-8 hour refresher course.

- **WHMIS** - The Workplace Hazardous Materials Information System (WHMIS) is a national system for handling hazardous and controlled products in the workplace. All workplaces are required to be in compliance with WHMIS occupational health and safety Standards whether cleaning solvents, or heavy-duty chemicals are used. As such, employers always appreciate WHMIS training.

Many different organizations offer WHMIS training both online or in person, and most can be completed within a few hours. The primary objective training is to provide participants with the skills necessary to protect their health and safety when working with, or in proximity to, WHMIS-controlled products

- **FOODSAFE** - The FOODSAFE Program is a comprehensive food safety-training program designed for the food service industry. FOODSAFE Level 1 is a food handling, sanitation and work safety course covering food safety and worker safety information including foodborne illness, receiving and storing food, preparing food, serving food, cleaning and sanitizing. FOODSAFE Level 1 courses usually take one day (6-8 hours) to complete, and are available face-to-face, online, and by correspondence.
- **Serving It Right** - Serving It Right is the provincially mandated certification for anyone working in a licensed establishment, and it provides education about legal responsibilities when serving alcohol, and provides effective techniques to prevent problems related to over-service. Serving It Right is administered by *go2hr*, which is BC's tourism industry human resource association. The course can be completed online in an hour or two.
- **Drivers License** - In the survey of job postings completed for this project, 15% of jobs required applicants to hold a valid drivers' license. Many Aboriginal people do not obtain or maintain valid drivers' licenses and therefore face barriers to employment – both of the high demand driving occupations, as well as occupations in the skilled trades where driving is a required component. Even where driving is not required for employment, having a valid drivers' license can facilitate employment by enabling transportation to and from a job site.

Obtaining a drivers' license requires no outstanding fines or tickets, and the ability to pass both a written exam and a road test. In BC, the drivers licensing system is “graduated” meaning that drivers must pass through two stages of licensing (Learner and New Drive) before receiving their Class 4 driver's license. This process takes a minimum of 18 months.

### 4.3 SKILLS FOR TRADES AND OTHER SKILLED OCCUPATIONS

#### *Train In-Class or On The Job*

Along with the entry-level occupations, there are numerous trades-related and other skilled occupations in high demand. The trades-related jobs all require training and certification through an apprenticeship and technical training. There are also several jobs in health care, education and forestry requiring certification and post-secondary training

See Appendix 7 for a list of the most prominent trades and other skilled occupations, the skills required, local training provides, and details on the job, along with related links.

Each of these occupations listed below have specific requirements for certification, including entry-requirements, preferred levels of prior education, Essential Skills, and testing.

- Carpenters
- Heavy Equipment Operators
- Electricians
- Welders
- Heavy Duty Mechanics
- Ironworkers
- Concrete Finishers
- Cement Masons
- Millwrights
- Powerline Technicians
- First Aid Attendants
- Truck Drivers
- Traffic Control/Flagger
- Cooks
- Health Care Aide
- Early Childhood Educator
- Engineering Technologist
- Forestry Technologist
- Registered Professional Forester
- Environmental / Heritage Monitors

### 4.4 SKILLS FOR PROFESSIONAL OCCUPATIONS

#### *Education Can Take You Far*

There are opportunities for job seekers with post-secondary degrees. While there are fewer job openings for professional occupations, the labour supply pool is much smaller. As such, people with the required education have a good chance of finding permanent full-time employment in their chosen profession. Most, but not all, professional-level employment opportunities are in the larger communities of Whistler and Pemberton.

The following five professional occupations represent the types of opportunities that exist in the St'át'ım̓c Territories: Accountant, Engineer, Teacher, Counselor, and Managers/ Supervisor.

See Appendix 8 for a list of the most prominent professional occupations, the skills required, local training provides, and details on the job, along with related links.

## 5.0 CONCLUSION

### 5.1 SUMMARY

*“More courses so people can get out and work”*

*Susan Napoleon, T'it'q'et*

There are over 4,700 St'át'ímc people in the Territory stretching from Whistler to Pemberton to Lillooet, encompassing eleven communities. The population is significantly younger than the general BC population, resulting in a large proportion of their population at or near the ages of typical job and career training. One-third of the St'át'ímc people are under 24 years of age, requiring specific services for youth.

Overall, the St'át'ímc have a potential workforce of almost 3,500 people. However, almost 1,000 have less than high school, and almost 1,000 have only a high school education. While there are over 1,200 St'át'ímc people with post-secondary education and training, well over half need significant skill building to meet basic job requirements.

The region is at a cross roads, and forestry is again on the rise, the most dominant industry in the local economy. As well, the BC Hydro settlement and related projects with BC Hydro and Innergex require large numbers of construction and related labour, providing a chance to train and employ dozens or even hundreds to St'át'ímc people.

The regional economy also boasts a significant tourism sector based out of Whistler but also stretching throughout the region. Business and public sector services are also required from administrative positions to semi-professionals and professionals.

The largest skill gaps tend to be with the low-skilled community members and the various entry-level and related opportunities. These members tend to need development with life skills, basic work skills and attitude, job search, and Essential Skill development. Once those issues are addressed, job-specific training and certificates can be provided to foster entry into the workplace.

For those with some related education, training, and experience, the construction phases of the various hydro projects offer numerous opportunities in apprenticeship within the skilled trades as well as administrative and management positions. These jobs require some basic skill building and offer clear pathways for career development. These skills are also transferable to jobs in forestry, mining and utilities. As well, entry-level skilled jobs in forestry can be accessed through various types of training, much of it compatible with the construction projects.

Alternatively, skills for jobs in hospitality and tourism in Whistler and other parts of the region can be built in the construction camps for cooks, housekeepers, and administration. Jobs supporting businesses and government agencies, including St'át'ímc governments, all require some levels of education and training.

Throughout the region, area employers identified computer and software training as essential. This is pronounced in several St'át'ímc communities, which have only recently, in the last ten years, gained reliable access to the Internet.

**5.2 RECOMMENDATIONS**

Six recommendations are presented below to address the key aspects identified in this study.

**1) Develop a comprehensive skills development strategy to address the skills gaps identified in this report**

- Include a youth strategy
- Include all key sectors
- Incorporate strategies for healing support to foster work readiness

**Designing training to employment systems that work must include measurable goals and targets.**

The Province of British Columbia provides up to date reports that include Summary of Labour Market Indicators including the following data by region:

Labour Force Participation Rates	Employment % of Labour Force with some PSE	Unemployment Rate (Aboriginal) EI Beneficiaries	Unemployment Rate Youth (18-24)

A major issue for St'at'imc Government Services is the use of regional data vs community data as the basis of annual plans and reports. Where data exists at the community level this should be the basis of all measures and success stories. The difference between provincial measures and recommended social indicators for St'at'imc will be the tracking of Employable Social Assistance beneficiaries instead of Employment Insurance Beneficiaries. This is also an indicator of strong and vibrant economies.

Social indicator questions could include:

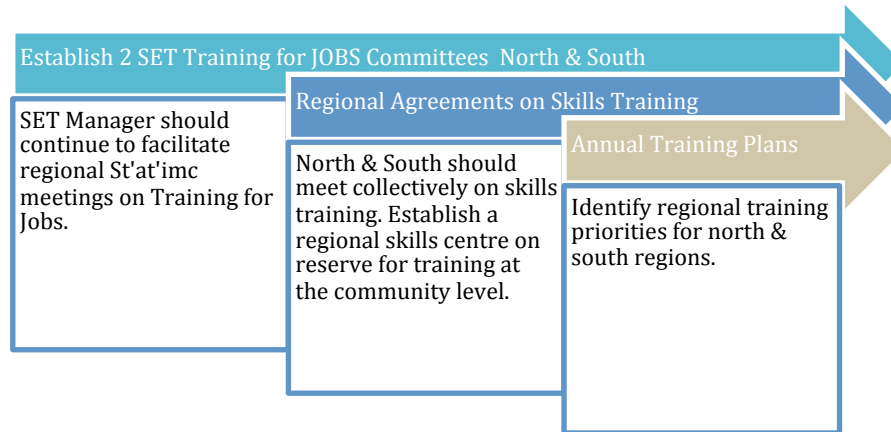

- What is the current unemployment rate for young people ages 18-24 and how can St'at'imc Government Service assist communities reduce youth employment? Identify annual targets?
- Once the current numbers of employable social assistance recipients in each community is known, is there a plan to assist these members obtain employment or skills training leading to employment?

The data and information exists and now action plans need to be developed to mitigate the unemployment, underemployment and limited access to opportunities.

**St'at'imc Skills Gap Strategy (SSGS)**

Implement a St'at'imc Skills Gap Strategy (SSGS) that reflects existing programs and past experiences; and builds on existing partnerships and experiences.

The SSGS should move forward with two regional Jobs committees that share information on jobs and training.

Regional geography and limited access to services, such as post-secondary education, have created a needs based approach to skills development. St'at'imc Government Services, managing the SET program, is uniquely situated to assist communities to design, develop and deliver labour market interventions. The SET manager should continue the work of labour market programming with support for two regional committees on Jobs and Skills Training. The SET recommends that long-term training planning infrastructure is required and already exists informally in both tribal councils.

The SET Program Research and Framework Document, 2013, suggest the need for more than planning infrastructure. The report recommends the development of a St'at'imc Employment and Training Centre. Achieving this will require agreement by the 10 participating First Nations on the need; ensure access to physical infrastructure and commitment to work collectively on bringing skills training to the territory.

- 2) **Develop the systems, delivery capabilities, and capacity of the St'at'imc to implement the strategy, including the hardware, the technical requirements, and the people**

**SET Training Advisory Committees**

The St'at'imc Skill Gap Analysis building on previous reports provides the catalyst for action. Linking local residents to local jobs based on skills training. This is best achieved by continuation of two training for jobs advisory committees, one located in Pemberton and one located in Lillooet. The SET program would be enhanced with a St'at'imc committees to continue the process and dialogue of linking people to jobs through skills training. The committees may elect to support a singular training centre with linkages to community based learning opportunities.

**Design a strategy for Jobs and Training**

St'at'imc Government Services has requested that social indicators be identified that will measure success with the SSGS. The indicators listed below can be reported on annually and provide the base for a longitudinal study from 2015-2020.

Social Indicators are measurable elements of a working system to track and manage outcomes in communities. The SET report provides a good basis of tracking Labour Force Participation rates and unemployment rates by community.

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

First Nations administer on-reserve Social Assistance (SA) and classify recipients as employable and unemployable. The Skills Gap Analysis did make enquiries on numbers of Employable SA clients by community, and while not listed in this report, the data exists. Youth unemployment data is also available by community and is the focus of the 'National First Nations Jobs Fund, first announced in Budget 2013. The First Nations Jobs Funds focuses exclusively on youth (18-24) on reserve identified as employable social assistance recipients.

### St'at'imc Skills Centre

The development of a St'at'imc Skills Centre will require federal and provincial partnership resourcing. Once established, it will be way to engage Industry/ Employers and provide capacity to meet future labour market demands.

To achieve this, annual training plans should be discussed with agreed upon consideration for economies of scale in training and employability of graduates from these training courses.

### 3) Seek out strategic investments, resources, and people to implement the strategy

- Incorporate with measures and career path milestones
- Identify mechanisms to measure success to foster accountability

### Regional Agreements on Skills Training

The St'at'imc communities would benefit by a regional agreement on skills training and apprenticeship models that are inclusive and provide economies of scale and efficiencies in terms of linking people to jobs. The important work of these communities must be collective and cooperative.

SET Jobs Training Committee in both the northern and southern communities, annual Goals and Targets, social indicators to measure success and baseline data to initiate action in 2015. There is also a need to identify outside partners and a clear process for matching people to jobs.

- 4) Develop and deliver coordinated and comprehensive employment assistance services across the region, including the three ASET holders and two WorkBC Centres
- 5) Develop models for meaningful partnerships on training and employment that also meet the needs of the St'at'imc organizations and citizens

### Building Partnerships for Success

Key to planning job training is developing partnerships with employers and other stakeholders.

6 The First Nations Job Funds: Economic Action Plan 2013: Jobs, Growth and Long-Term Prosperity, Federal Budget.

**Profit vs Non Profit?**

The St'át'imc system of meeting local skills gap must be based on a not for profit structure, where emphasis is based on linking clients to employers. Non-profits can be registered within the province and established with a governance structure, accountability measures and annual reports. Generally, any profit is used for the purposes of the non- profit and are non- taxable. The accountability measures profit as a basis for effective governance of employment and training. Local for profit organizations are not required to report to communities or report the use the profit for a specific purpose as with the Societies ACT.

It is important that accountability measures be included and the organization be guided by the stakeholders, in this case, communities, employers and training partners.

- 6) Conduct a similar analysis and skills development strategy that includes St'át'imc people away from home**

## SKILLS GAP ANALYSIS - 2015

Funding provided by the Government of Canada through the Canada-British Columbia Job Fund

## APPENDIX 1: REGIONAL EMPLOYMENT AND TRAINING SERVICE AGENCIES

### ABORIGINAL SKILLS AND EMPLOYMENT TRAINING STRATEGY

Aboriginal Skills and Employment Training Strategy (ASETS) is a national strategy to support Aboriginal employment and training through Human Resources and Skills Development Canada's Skills and Employment Branch-Aboriginal Affairs Directorate along with Service Canada.

ASETS holders design and deliver employment programs and services focusing on three priorities:

- Supporting demand-driven skills development
- Fostering partnerships with the private sector and with the provinces and territories
- Placing emphasis on accountability and results

There are 16 Aboriginal organizations in BC who are ASETS agreement holders, and three of them serve SGS Nations: First Nations Employment Society (FNES), Stó:lō Aboriginal Skills & Employment Training (SASET), and Shuswap Nation Tribal Council. Brief descriptions of each are provided below along with contact information.

#### FIRST NATIONS EMPLOYMENT SOCIETY

First Nations Employment Society (FNES) represents ten First Nations and serves four labour markets, including the Pemberton Region in the northern part of their service area. FNES serves Lil'wat First Nation and N'Quatqua First Nation. Aboriginal people living in other communities in the Squamish-Lillooet Regional District may also qualify to access services and supports from FNES.

FNES offers a variety of training programs and employment services, and has forged partnerships with many employers and trainers including, but not limited to: ITA BC, Telus, Royal Bank, CN Rail, and Indigena Solutions.

- Website: [www.fnes.ca](http://www.fnes.ca)
- Address: 395 Railway Street, Vancouver, BC V6A 1A6
- Phone: 604-605-7194
- Email: [jobsinfo@fnes.ca](mailto:jobsinfo@fnes.ca)

#### STÓ:LŌ ABORIGINAL SKILLS & EMPLOYMENT TRAINING

Stó:lō Aboriginal Skills & Employment Training (SASET) is the ASET holder for the Fraser Valley Region, and serves Skatin, Sahmaqum, and Douglas Nations, however they are mandated to serve Aboriginal people regardless of place of origin if they are 15 years of age or older and live in the SASET catchment area.

SASET provides a full suite of employment assistance services, including employment readiness workshops, employment counselors, access to education and trades training information, labour market information, computers with internet access, photocopy and fax service, as well as a job posting board a resource library. SASET also runs regular training programs including, but not limited to: Career Decisions Making Program, Construction Training Program, Forestry Skills Training.

- Website: [www.saset.ca](http://www.saset.ca)
- Address: Bldg. #8A – 7201 Vedder Rd., Chilliwack, BC V2R 4G3
- Phone: 604-858-3691 Toll-Free: 1-888-845-4455
- Email: [saset@stolonation.bc.ca](mailto:saset@stolonation.bc.ca)

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

### INTERIOR SALISH EMPLOYMENT AND TRAINING SOCIETY

The Shuswap Nation Tribal Council is the ASETS holder for the region, and delivers services for the upper St'át'imc people through the Interior Salish Employment and Training Society (ISETS), based out of Merritt. The St'át'imc communities served by ISETS include: Xwísten, Ts'kw'aylac, Cayoose, Tsalálh, Lilloet, and Xax'lip,

- Websites: [www.isets.ca](http://www.isets.ca) <http://shuswapnation.org/departments/asets/>
- Address: SNTC 680 Athabasca Street West, Kamloops, BC V2H 1C4
- Phone: 778-471-8200
- Email: [workliaison@shuswapnation.org](mailto:workliaison@shuswapnation.org)

### WORKBC EMPLOYMENT SERVICE CENTRES

WorkBC Employment Service Centres (ESC) is a provincial government initiative in partnership with the federal government that offers “one-stop employment services.” Each ESC offers the following services for job seekers:

- Self-serve Resource Area
  - Job postings
  - Resume and cover letter samples
  - Labour market information
  - Computer workstations with internet
  - Phones, fax, and photocopiers for job search activities
- Case Managers for those who need more guidance and support
- Personal Employment Planning to identify and overcome obstacles to employment
- Support accessing other programs and services, including:
  - Apprenticeships
  - Disability Services
  - Skills Training
  - Self-Employment orientation, assessment and training
  - Wage Subsidy

Most ESCs also offer workshops and training to assist job seekers. Workshop categories include, but are not limited to: job search, job maintenance, life skills, and employability.

There are two WorkBC ESCs providing services to St'át'imc communities.

### SEA TO SKY - SQUAMISH AND WHISTLER EMPLOYMENT SERVICE CENTRE

The Sea to Sky - Squamish and Whistler Employment Service Centre offers services in Whistler Village and Pemberton at the following locations:

Whistler Public Library Community Room  
4329 Main Street  
Mondays 1:00pm to 4:00pm

WCSS Food Bank  
1519 Spring Creek Drive  
Mondays 10:00am to 12:00pm

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

Pemberton Library  
7390 Cottonwood Street  
Thursdays 1:00pm to 4:00pm

It is also possible to have a WorkBC Case Manager arrange to meet at another location if needed.

- Website: [www.squamishesc.com](http://www.squamishesc.com)
- Address (Whistler Location): #204-1200 Alpha Lake Road, Whistler BC V0N 1B1
- Phone: 604-932-1600
- Email: email contact form available on website

### LILLOOET WORKBC EMPLOYMENT SERVICE CENTRE

Open Door Group and the Lillooet Employment Service Network have partnered to deliver the Employment Program of BC (EPBC) at the WorkBC Employment Services Centre in Lillooet. The Lillooet ESC has a strong focus on developing partnerships with local employers in order to best serve their clients seeking employment.

- Website: [www.lillooetesc.ca](http://www.lillooetesc.ca)
- Address: 639B Main Street, Lillooet, British Columbia, V0K 1V0
- Phone: 250-256-7758
- Email: [info@lillooetesc.ca](mailto:info@lillooetesc.ca)

## POST-SECONDARY TRAINING PROVIDERS

### THOMPSON RIVERS UNIVERSITY

Thompson Rivers University (TRU) has over 24,000 students 11% of whom are Aboriginal. TRU offers 140 on-campus programs and 57 Open Learning programs online and by distance. TRU has campuses in Kamloops and Williams Lake as well as regional centres in 100 Mile House, Clearwater, Barriere, Ashcroft, and Lillooet and Lytton.

### TRU Lillooet & Lytton Training and Education Centre

The TRU Lillooet Training and Education has a classroom capacity for 20 students, computer lab (15 computers) and conference room. The Centre offers courses in Business and Office Skills, Computers, First Aid, Personal Development, Tourism and Trades and Technology. The MicroComputers in Business Certificate helps students to become proficient in the computer skills needed to work in an office environment. A wide range of courses are offered in Health and Safety, such as CPR, OFA Level 1-3, Foodsafe, and WHMIS. TRU Lillooet also offers distance learning in academic programs, certificates, trades programs, preparation to industry programs, and first year university degree courses.

In addition to serving learners, TRU Lillooet can provide businesses and agencies with individualized courses or workshops at other sites upon request, including test supervision, with notice and for a fee.

- Website: [www.tru.ca/regional](http://www.tru.ca/regional)
- Address: #10 - 155 Main Street, Lillooet, British Columbia, V0K 1V0
- Phone: 250.256.4278
- Email: [jbryson@tru.ca](mailto:jbryson@tru.ca)

### **NICOLA VALLEY INSTITUTE OF TECHNOLOGY**

Nicola Valley Institute of Technology (NVIT) proudly proclaims itself “The Home of Aboriginal Public Education in BC.” The five founding bands of NVIT include: Coldwater, Lower Nicola, Nooaitch, Shackan, and Upper Nicola. With campuses in Merritt and Vancouver, NVIT currently serves over 1,300 students.

In addition to 11 different programs, the Merritt Campus offers students on-campus housing, daycare services as well as a bookstore and library.

- Website: [www.nvit.ca](http://www.nvit.ca)
- Address: 4155 Belshaw Street, Merritt, BC V1K 1R1
- Phone: 1-877-682-3300
- Email: [info@nvit.bc.ca](mailto:info@nvit.bc.ca)

### **CAPILANO UNIVERSITY**

Capilano University serves 7,500 credit students and 7,000 non-credit students annually. In addition to the main campus in North Vancouver, it also has regional centres on the Sunshine Coast Campus and in Squamish. The Squamish campus serves the communities of Squamish, Whistler, Mount Currie and Pemberton.

Capilano University’s Squamish Campus offers the Wilderness Leadership Program as well as courses in Business Administration and Arts and Sciences.

- Website: [www.capilanou.ca/squamish/](http://www.capilanou.ca/squamish/)
- Address: PO Box 1538, 1150 Carson Place, Squamish, BC, V8B 0B1
- Phone: 604.892.5322
- Email: [squamish@capilanou.ca](mailto:squamish@capilanou.ca)

## **BUSINESS SERVICES AGENCIES**

### **WHISTLER CHAMBER OF COMMERCE**

The Whistler Chamber of Commerce represents over 800 member businesses in the Resort Municipality of Whistler. They are recognized as the “Voice of Business” in the area and their stated mission is, “*To maximize success within the context of achieving sustained prosperity for all businesses in Whistler by providing leadership, support, resources and tools.*” The resources and tools they offer include a multitude of e-learning courses and training sessions including a regular rotation of classes in bookkeeping, Microsoft Excel, first aid, FoodSafe, micro-business training, sales success, social media and PR. The Chamber’s website also offers a variety of employment resources for both employers and job seekers including a job board.

- Website: [www.whistlerchamber.com](http://www.whistlerchamber.com)
- Address: 201 - 4230 Gateway Drive, Whistler, BC VON 1B4
- Phone: 604.932.5922
- Email: [chamber@whistlerchamber.com](mailto:chamber@whistlerchamber.com)

### **PEMBERTON AND DISTRICT CHAMBER OF COMMERCE**

The Pemberton and District Chamber of Commerce serves the Village of Pemberton as well as Mt. Currie, Pemberton Meadows, Birken and D’arcy. The Chamber’s goal is to support business, economic growth and diversification, and provide important resources and benefits to over 150 members. The Pemberton Chamber’s website includes a job board.

## APPENDIX 2: 2011 CENSUS DATA

The data is from the 2011 Census, collected across Canada in the spring of 2011. The data was compiled by Census Canada under special request to filter the responses with Aboriginal identify only, through the self-identification method on the Census form.

Two sets of data were provided by Statistics Canada on special request:

- Demographic Targeted Profile – age and language data
- Basic Targeted Profile – more comprehensive data including education and employment

The data sets presented included several thousand Census regions in Canada, every region with significant amounts of community data. Once received, the Census regions corresponding to the *St'át'imc Territory* were identified and compiled together.

The *St'át'imc Territory* stretches from Whistler in the west to Lillooet in the east, and the Head of Harrison Lake in the south to the Markers and Elbow Pass and China Head Mountain in the north. The closest major Census region to the *St'át'imc Territory* is the *Squamish Lillooet Regional District*, although it includes both the Squamish Nation and Squamish District Municipality, and does not include the southern communities near Harrison Lake.

Therefore, the *St'át'imc* data was constructed using the various regional district regions, municipalities, and of course the Reserve communities, corresponding to the eleven *St'át'imc* communities. The various Census regions are presented below, with the Reserve communities listed under their corresponding Bands/Nations.

### St'át'imc Region includes data from the following Census districts:

#### Regional Districts

- Squamish Lillooet Regional District A
- Squamish Lillooet Regional District B
- Squamish Lillooet Regional District C
- Fraser Valley Regional District C

#### Municipalities

- Pemberton Village
- Whistler District Municipality
- Lillooet District Municipality

#### Reserves

|---|---|

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

\* The data from these three Reserves (Marble Canyon 3; Douglas 8; Tipella 7) were very small, and therefore not included in the two Census reports. Data from these communities were collected from the Census Canada website ([www12.statcan.ca/census-recensement/2011/dp-pd/prof/index.cfm?Lang=E](http://www12.statcan.ca/census-recensement/2011/dp-pd/prof/index.cfm?Lang=E)). Only the overall population figures are available, and not the various breakdowns of age, gender, education, or employment.

### DATA LIMITATIONS

Overall, the Census data can be incomplete in many categories, as the data tends to be less reliable for the smaller communities, and some communities presented with zero data. As the populations for most of the St'át'imc communities tend to be quite small, some of the data can be missing. Also, as the data is usually presented rounded up/down to multiples of 5, some of the smaller data can also be skewed. For example, a community with 24 people (12 men and 12 women) can be presented as 25 people, with 10 men and 10 women. Therefore, many of the tables do not add up.

Overall the 2011 Census figures presented in this section are straight from the data. This project added them up for the particular St'át'imc region, but otherwise the data is unprocessed. Therefore in many cases, the numbers will not add up under certain categories, or have different totals from one category to the next. As with all statistical data, these are estimates of the population on July 1, 2011. They are used here in this analysis as a starting point. All of the community figures have been reviewed by the administration from each of the communities to validate the data. Where significant discrepancies have been identified, they are noted under each community.

### NOTES ON KEY TERMS

The 2011 Census data used in this report utilizes some common terms, but with specific meanings. For example, the term “unemployed” for many people means people not currently working; but with this data, the term unemployed refers to people defined as in the labour force who are currently looking for work. Therefore, retirees, homemakers, and persons with disabilities unable to work, and persons who are long term unemployed, are not counted in this category.

A list of definitions of some of the common terms is presented below.

- **Population:** The number of people, included in a survey or census, to whom the results of that survey or census apply to. In this case the number of people from whom information was gathered in each of the eleven St'át'imc communities.
- **Median age:** The age that is in the middle of the range of ages present in a given population sample. It is the middle point in a distribution, meaning half of the age values are above and half are below. For example in a sample of people who's ages are 21, 23, 24, 25, 26, 28, 30, 32, 33, the median age would be 26, as half the people are younger and half are older.
- **Population 15 and over:** Number of people aged 15 years and older out of the total number of people surveyed in each area. This is a key number as it shows the proportion of the total population considered to be in the working-age.
- **In the labour force:** This term refers to the proportion of the surveyed population, 15 years and older, who is actively participating in the labour market. This includes people who are employed and those who are unemployed but actively searching for work.
- **Not in the labour force:** Number of people who are not actively participating in the labour market such as institutional residents, retired, attending an educational institution or voluntarily inactive.
- **Participation rate:** This measure, expressed in percentage, outlines the share of the working-age population (15 yrs and over) who are either employed or unemployed (but looking for work). It represents the portion of the surveyed population (working-age) that is working or looking for work.

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

- **Employed:** Those who during the week of the survey did any work at all, that is paid work, in an employer-employee setting or self- employed.
- **Employment rate:** The percentage of the working age (15 yrs and over) population in the labour force surveyed actively working. This is a more accurate measure of the labour market than the unemployment rate as it represents the amount of people who are able to acquire a job when they actively search for one.
- **Unemployed:** Overall this term refers to people who are not currently employed but who are actively looking for work and at the time of the survey were available for work.
- **Unemployment rate:** The percentage of working-age (15 yrs and over) of the population actively looking for work but who are not currently employed. This is a harder measure to trust as it is based on the assumption that people are “in” the labour force, meaning that they are in fact actively looking for work.

APPENDIX 3: COMMUNITY DATA

FIGURE 20: ST'ÁT'IMC AGE AND GENDER

**LIL'WAT – MOUNT CURRIE**

Lil'wat at Mount Currie, near Pemberton, is the largest of the St'át'imc communities, with a 2011 Census population of 1,365 people, of which 1,265 live on the Mount Currie Reserve, and 105 people live on the Nesuch 3 Reserve.

Mount Currie IRI	1,265
Nesuch 3 IRI	105
<b>Total Population</b>	<b>1,365</b>

The community has a median age of 28.5 years old, with a youth population of 240 people between 15 and 24 years old, and a working age population of 910 people, aged 15-64 years old.

0 – 14 years old	380
15 – 24 years old	240
15 – 64 years old	910
65 years and older	60
<b>Total Population</b>	<b>1,365</b>

Of the total reported labour force population of 975 people, 540 people were classified as in the labour force, and 440 people were classified as not in the labour force. Of those in the labour force, 370 were employed, and 170 were unemployed.

Not in the Labour Force	440
In the Labour Force	540
<i>Labour Force Participation Rate</i>	<i>55.1%</i>
Employed	370
<i>Employment Rate</i>	<i>68.5%</i>
Unemployed	170
<i>Unemployment Rate</i>	<i>31.5%</i>
<b>Total Labour Force</b>	<b>975</b>

Of the total reported labour force population of 975 people, one-third, 325 people had no high school certificate or diploma, while 310 people had high school or equivalent as their highest level of education. The community had 145 people with an apprenticeship or trades certificate, 170 people with a college or university certificate, and 15 people with a bachelor's degree or higher.

No certificate, diploma or degree	325
High school diploma or equivalent	310
Apprenticeship or trades certificate or diploma	145
University or non-university certificate or diploma	170
Bachelor degree and above	15
<b>Total Labour Force</b>	<b>975</b>

**XWÍSTEN – BRIDGE RIVER**

Xwísten (Bridge River) located near Lillooet with a 2011 Census population of 225 people, all of which live on the Nxwisten Reserve.

The community has a median age of 31.1 years old, with a youth population of 40 people between 15 and 24 years old, and a working age population of 150 people, aged 15-64 years old.

0 – 14 years old	55
15 – 24 years old	40
15 – 64 years old	150
65 years and older	10
<b>Total Population</b>	<b>225</b>

## APPENDIX 4: OCCUPATIONAL TABLES – ENTRY-LEVEL JOBS

### **A new and better approach to matching skills possessed by individuals and the demand for job ready skills will mean retooling and supporting an effective and efficient front-line case-management system**

Recent studies<sup>7</sup> have indicated that there is a need for a paradigm shift in the way we think about the skills gap and the skills individuals possess. Individuals often may not possess formal or higher level education as required by a credentials list but may have foundational skills necessary to meet the minimal requirements for employment. This suggests that there is a need to be better alignment and identification/measurement of skills compared to the current demand by employers.

There is opportunity in future labour market programming and services for Aboriginal people to address and focus on a properly resourced and expertly managed case management system that ensures work ready individuals are on a career continuum that incorporates specific job skill requirements that can be identified through a job analysis or occupational profile that summarizes the competencies, knowledge, skills, abilities, and behaviors directly related to performance on the job.

We are often preoccupied with a process that tends to focus on what skills or formal education the client does not have, when the focus should be placed on the skills clients do possess and provide opportunities for refinement. For example, for individuals that do not possess secondary or post-secondary education, the current system of assessment measures 'educational attainment' and is predisposed to place those individuals on the return to school pathway. Although this is a great course of action for any individual, there are individuals who possess foundational skills to secure employment that could be refined in the short term leading to employment.

For individuals who have been out of the educational system for more than three years, it is often a difficult decision, often with no guarantee for success to accept re-entering the mainstream education system to complete high-school equivalency or to meet college/university entrance requirements.

<sup>7</sup> <http://www.act.org/research/policymakers/pdf/abettermeasure.pdf>

## ST'ÁT'IMC HUMAN RESOURCES PLANNING PROJECT: SKILLS GAP ANALYSIS

Does Higher Education mean Job Success? Meeting the Skills Gap means understanding employment requirements. Are individual client assessments based on specific occupational requirements? What will lead to job success and reducing the skills gap for employers?

It will be necessary for service organizations to review and assess their existing case management systems to better understand their ability and capacity to meet demand for better skills identification that responds effectively to meet employment demand while encouraging long term career development. We like to refer to the case management system that is based on job demand as a learning management system.

So how can we assess individuals for job entry? Where do we start? How can we assist individuals acquire the competencies required by employers? Let's consider the two main routes to obtaining job credentials in Canada. Jobs that you train for and jobs where they train you.

Considering that most jobs in Canada can be placed in one of two categories above, working with employers is the key to understanding job requirements. This means building on existing occupational data found in the **National Occupational Classification 2011**<sup>8</sup>. Foundational skills are more commonly known in Canada as Essential Skills and Canada recognizes 9 competencies or Essential Skills<sup>9</sup>. The ability to assess these competencies against specific occupations is the right step towards the skills gap process.

<sup>8</sup> [www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx](http://www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx)

<sup>9</sup> <http://www.skillscanada.bc.ca/EssentialSkills.aspx>

**Essential Skills 3G**  
**HOW IT WORKS**

- 1 Select a Career**
- 2 Complete the Assessment**

---

**3a Have the Skills**  
 The client has the Essential Skills for their selected occupation.

**4a Employment or Training**

**3b Don't Have the Skills Yet**  
 The client does not yet have the Essential Skills for their selected occupation.

**4b Learning Plan**  
 ESE3G generates a customized Learning Plan to help the client boost their Essential Skills (with the online PLATO Learning Management System)

**5b Retake Assessment**  
 After 30 days

**ESE3G** | *your career starts here* **Aboriginal SKILLS GROUP**

Essential Skills assessments, based on specific occupations, have been developed in several provinces across Canada. In British Columbia, the Aboriginal Skills Group has been providing specific occupational skills assessments since 2008. These are a pre requisite for skill enhancement and a solid basis for front line case management. Essential Skills are also learning skills and early identification can better prepare people for specific occupational training, whether is it on the job or some formal path to occupational certification.

If there are gaps in the case management systems/processes, partnerships between learning institutions, employers and service organizations should be sought and encouraged to provide maximum capacity and expertise for case managers/employment counsellors. Without the supports and expertise needed to evolve an effective and efficient case management system that addresses skills gaps effectively with labour force demand, maintaining the status quo can only stymie the rate of success and Labour force attachment by Aboriginal people.
